

Find it Fast! Part 7

Pick 'n' Mix: small specialised databases for assignments and dissertations

Susan McCourt, Janet MacKay & Elaine Shallcross
2011/12

UNIVERSITY
OF ABERDEEN

Outline

- Importance of planning your search
- Why use databases
- Outline major databases
- Using Primo to find what we have
- Off campus access - technical issues
- Practical time to pick'n'mix!
- Staff on hand to help – please ask!

Library
Special Collections

Hypothetical research topic

Use of genetic engineering in grain crops in developing countries

UNIVERSITY
OF ABERDEEN

Brainstorm concepts in keywords and phrases:

“genetic modification” “genetic
engineering” GM “drought
resistance” “developing countries”
“developing nations” India
Bangladesh Ethiopia maize
“Zea mays” rice “Oryza sativa”

concepts	alternative keywords		
Idea 1	"genetic* engineer*"	"genetic* modif*"	GM
Idea 2	"developing countr*"	"developing nation?"	<i>Specific ones? e.g. India, Nigeria</i>
Idea 3	soybean?	maize	rice

Library
Special Collections
and Museums

← OR → www.abdn.ac.uk/library

Why use databases ...

- Catalogue – what we hold
- Database – what has been published
 - Bibliographic
 - Links to full text material
 - Full text
- NOTE: Web pages – not refereed, may not be scholarly or academic

Important databases

- **Scopus** and **Web of Science/Knowledge** are the biggest and broadest databases available. Bibliographic with links via SFX to electronic books and journals we pay for
- **Specialist:**
 - **Medline** is the largest medical database (also available as PubMed)
 - **ABI Inform** and **Econlit** are specialist business, management and economics databases
 - **ATLA** is the biggest religion database
 - **LION** database useful for topics related to English
 - **Lexis®Library**, **HeinOnline** and **Westlaw** are core databases in law
 - **IEEE Xplore** for engineering & computer science
 - **Reaxys** specialist chemistry database
- **JSTOR** full text database - extremely useful for older material (covers most subject areas)

Plant Science (CSA) [Hide Info](#)

Type: Abstracts PLUS

Description: Plant Science is a bibliographic database containing citations and abstracts of scientific literature on plant science, focussing on all plant scientific aspects, especially on pathology, symbiosis, biochemistry, genetics, biotechnology, techniques and environmental biology. Over 250 primary research journals are scanned by specialized scientific editors to add approximately 23,000 titles to the database each year. From July 1996 onwards, informative abstracts have been added when available.

Authentication Route: Shibboleth/UK Federation

Search hints: For searching this database from <http://www.csa1.co.uk>

Recommendation: link out and carry out your search on individual databases – more powerful searches available and very different results...

Much higher number of references found with exactly the same search (548 compared with 1)...

The screenshot shows a Primo search interface. At the top, there are navigation links: Search, Sources, Analytics, My alerts, My list, My settings, Live Chat, and Help. Below this is a 'Quick Search' box with a search button. A red box highlights the search results count: 'Scopus: 548'. Below the search bar, the query is displayed: '(TITLE-ABS-KEY("genetic* modifi*" OR gm OR "genetic* engineer*") AND TITLE-ABS-KEY("developing countr*" OR "developing nation*")) AND SUBJAREA(mult OR agri OR bioc OR immu OR neur OR phar)'. There are buttons for Edit, Save, Set alert, Set feed, and View search history.

The main results area shows 'Document results: 548' and 'Show all abstracts'. It includes a 'Go to page: 1 of 28' section with 'Go' and 'Next >' buttons. Below this are options for 'With selected:' including All, Page, Download PDF, Export, Print, Email, Create bibliography, Add to My List, View citation overview, View citations, and View references. A 'Sort by' dropdown is set to 'Date (Newest)'.

The results are displayed in a table with columns: Document title, Author(s), Date, Source title, and Citations. The first three results are visible:

Document title	Author(s)	Date	Source title	Citations
1 <input type="checkbox"/> Role of transgenic plants in agriculture and biopharming	Ahmad, P., Ashraf, M., Younis, M., Hu, X., Kumar, A., Akram, N.A., Al-Qurainy, F.	2011	<i>Biotechnology Advances</i> Article in Press	0
2 <input type="checkbox"/> Response to issues on GM agriculture in Africa: Are transgenic crops safe?	Adenle, A.A.	2011	<i>BMC Research Notes</i> , pp. 388 Article in Press	0
3 <input type="checkbox"/> A semi-quantitative approach to GMO risk-benefit analysis	Morris, E.J.	2011	<i>Transgenic Research</i> 20 (5), pp. 1055-1071	0

On the left side, there are filters for 'Search within results' and 'Refine results'. The 'Year' filter shows counts for 2011 (33), 2010 (49), 2009 (31), 2008 (34), and 2007 (38). The 'Author Name' filter shows 'Qaim, M.' (11) and 'Cappell...' (6).

**Use Primo with care
– be aware of its limitations!**

Pick'n'Mix databases

- Many specialised databases are “hosted” on supplier “platforms” (search interfaces)
- Each platform has its own search rules
- Examples:
 - CSA Illumina (wide subject range but strong in biological sciences)
 - EBSCO (wide subject range)
 - Ovid (for Medical related databases)
- JSTOR is an independent database

Pick'n'Mix databases

- Many specialised databases are “hosted” on supplier “platforms” (search interfaces)
- Each platform has its own search rules
- Examples:
 - CSA Illumina (wide subject range but strong in biological sciences)
 - EBSCO (wide subject range)
 - Ovid (for Medical related databases)
- JSTOR is an independent database

Why use CSA?

- **CSA= platform (or host) for 30+ databases**
 - Arts & Humanities
 - Natural Sciences especially Biological sciences
 - Social Sciences
 - Technology
 - Specialised databases with some content not found on other databases such as Scopus, Web of Knowledge or EBSCO
- **Easy to use**
 - Simple search rules
 - Easy to understand search screens
 - Links full text and library catalogue
 - Direct export to RefWorks
 - Lots of help available

CSA Illumina: clear layout of search options

[Add Row](#) | [Remove Row](#)

	(<input type="text"/>	or	<input type="text"/>	or	<input type="text"/>)	Anywhere	▼	
and	▼	(<input type="text"/>	or	<input type="text"/>	or	<input type="text"/>)	Anywhere	▼
and	▼	(<input type="text"/>	or	<input type="text"/>	or	<input type="text"/>)	Anywhere	▼

[Search Tips](#): e.g., wildcard*, exact phrase; use Keywords for a single search of Title, Abstract, Descriptors

What is JSTOR?

- **JSTOR is not a current issues database**
- **Archive of backfiles** of scholarly journals as far back as 17th century, many to 19th century
- **Moving wall** = time period (commonly 3-5 years) between the last issue available in JSTOR and the most recently published issue of a journal
 - protects publishers from the threat of lost revenues if recent issues were available
 - a few publishers provide links to recent content on their own websites
 - via SFX
 - search article citations using the JSTOR search engine

Why use JSTOR?

- Reliable and comprehensive archive of important scholarly journal literature
- Spans many disciplines; good coverage in the humanities and social sciences, less useful in engineering and related subjects
- Easy to use
 - Simple search rules
 - Links to full text
 - One step export to RefWorks
 - Help available

CLICK TO SEARCH

Why use IEEE Xplore?

<http://ieeexplore.ieee.org/Xplore/dynhome.jsp>

- Database covering engineering and technology, computer science
- Access to the abstract records + full text articles published since 1988
- Selected content published since 1893 from:
 - IEEE journals, transactions, and magazines
 - IEEE conference proceedings
 - IET journals
 - IET conference proceedings
 - IEEE published standards
- For more information: www.ieee.org/go/iel

Why use Reaxys?

<https://www.reaxys.com/>

- Specialist database for chemistry
- Based on the combined content of:
 - CrossFire Database Suite, covering organic, inorganic and organometallic chemistry
- Designed to support synthesis planning from idea through to implementation

Off Campus Access Technical Issues

- When on campus you are on a network that is recognised by our suppliers. Additional utilities/plugins often already installed so that software works.
BUT you must install RefWorks Write-N-Cite on your office/home computer.
- When off campus you will have to:
 - enter proxy settings
 - allow pop-ups and cookies for certain sites, e.g. ebrary, RefWorks
 - install extra plugins e.g. ebrary reader, Write-N-Cite
- See relevant library guides and computing fact sheets at www.abdn.ac.uk/library/support/guides/
- Check www.abdn.ac.uk/proxy/

Help and Advice

- Access problems – IT Service Desk
extn. 3636 e-mail servicedesk@abdn.ac.uk
- Subject support – Information Consultants
- Library Guides
all online, many printed – free
