
Researcher Development Programme 2012/13

# Literature Searching, Part 1: Essential Skills for Success

Janet MacKay, Susan McCourt & Elaine Shallcross

The Sir Duncan Rice Library

# Aims & Objectives

## Aims

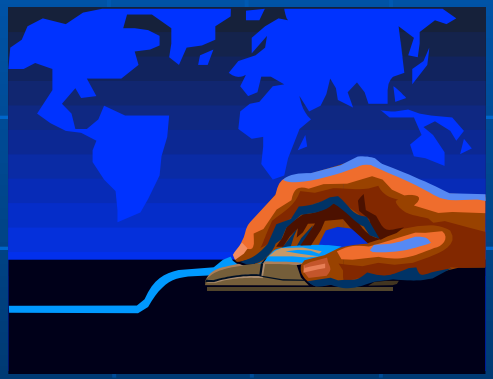
- An overview of the methods and resources available for finding information for your research
- Includes:
  - Planning a literature search
  - Applying your search to a number of resources
    - Primo, electronic books
    - Databases
    - Web
  - Responsibilities: plagiarism & copyright, technical issues concerning off-campus access to e-resources
  - Next steps
    - RefWorks

## Objectives

- To find and manage high quality information for your theses

© Library, Special Collections & Museums, 2012/13

# Successful searching: planning, using Primo, finding e-books ...



Elaine Shallcross

# Planning your Search

Never type your research topic into a database or catalogue …. you will get little or no results!

First things first …
take a pencil and paper – and do some brainstorming

- Only takes a few minutes
- Saves time in the long run
- What information are you looking for?
- Analyse the topic …

© Library, Special Collections & Museums, 2012/13

# Planning your Search

- Think about
  - Time
  - Topic – break it down into ideas (concepts); keywords and phrases
  - Words (spelling, alternative words, truncation)
  - Linking words (Boolean logic - and/or)
- Write them down in a table

© Library, Special Collections & Museums, 2012/13

# Hypothetical research topic:

# Chocolate: Health Food or Health Risk?

Brainstorm... keywords

chocolate cocoa "dark chocolate" diet nutrition cardiovascular cardiac cholesterol flavonoids polyphenols antioxidants "trans fatty acids" health "well being"

© Library, Special Collections & Museums, 2012/13

# “Chocolate - health food or health risk?”

| concepts | alternative keywords | | |
|---|---|---|---|
| Idea 1 | chocolate | cocoa | cocao |
| Idea 2 | nutrition* | diet* | |
| Idea 3 | health* | well-being | “well being” |
| Idea 4 | I may want to pursue other concepts to do with specific aspects of health such as *cardiovascular, heart, cholesterol*; or *flavonoids, polyphenols, antioxidants, “trans fatty acids”* | | |

AND

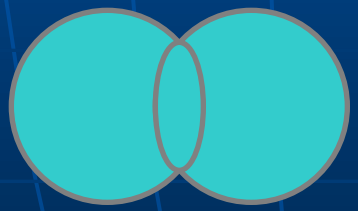
OR

© Library, Special Collections & Museums, 2012/13

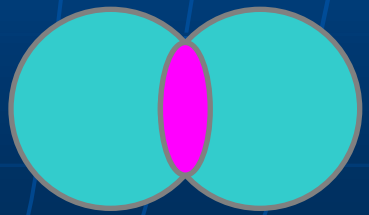
# Boolean Searching

- Linking of words, phrases and concepts for searching in databases and the Web
- AND, OR are main operators
- NOT cuts out unwanted terms

  Use with care!!



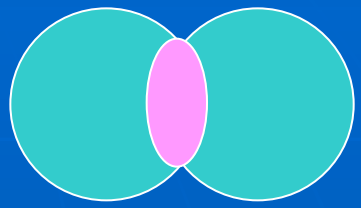
chocolate OR cocoa



chocolate AND diet

© Library, Special Collections & Museums, 2012/13

# Boolean searching



- **OR** Broadens the search
  Use alternative words
- **AND** Narrows the search
  More specific
- **NOT** Cuts out unwanted terms
  Use with care!!

© Library, Special Collections & Museums, 2012/13

# What's next?

- Use the planning sheet in your handout pack
- Brainstorm keywords and phrases for your research in the top box
- Apply some order and organisation to the main keywords ones in the sheet/grid/matrix

© Library, Special Collections & Museums, 2012/13

# Looking for Information

Document types:

- Books
  - Primo (Resource Discovery Tool) – books and specific journal articles
  - E-book collections e.g. ebrary
- Research articles and conference papers
  - Database(s) - (Scopus in this workshop)
- Reports, manuals, operational and support material
  - Web search tools

Important to look up the search rules for the resources/tools you will use

© Library, Special Collections & Museums, 2012/13

# Sourcing Information: Primo

- www.abdn.ac.uk/library/
- Only effectively searches at title level – may need more general approach to search terms
- Cannot find chapters in books
- May find articles in journals – special search tab for this
- Can link out to electronic resources using the SFX service

© Library, Special Collections & Museums, 2012/13

# Primo Search Rules

- Link ideas with Boolean operator - AND
- Link alternative meanings with Boolean operator – OR
- Boolean operators must be in capital letters
- Use a Truncation symbol (*) to catch singular and plural forms; word endings e.g. *diet** finds *diet; diets; dietary*
- Use a Wildcard symbol (?) to find individual letters e.g. *organi?e* finds *organise; organize*
- Can use "phrase searching"

© Library, Special Collections & Museums, 2012/13

# Finding resources on Primo to support your research – when you do not know what is available …

© Library, Special Collections & Museums, 2012/13

# Link from the Library home page at http://www.abdn.ac.uk/library/

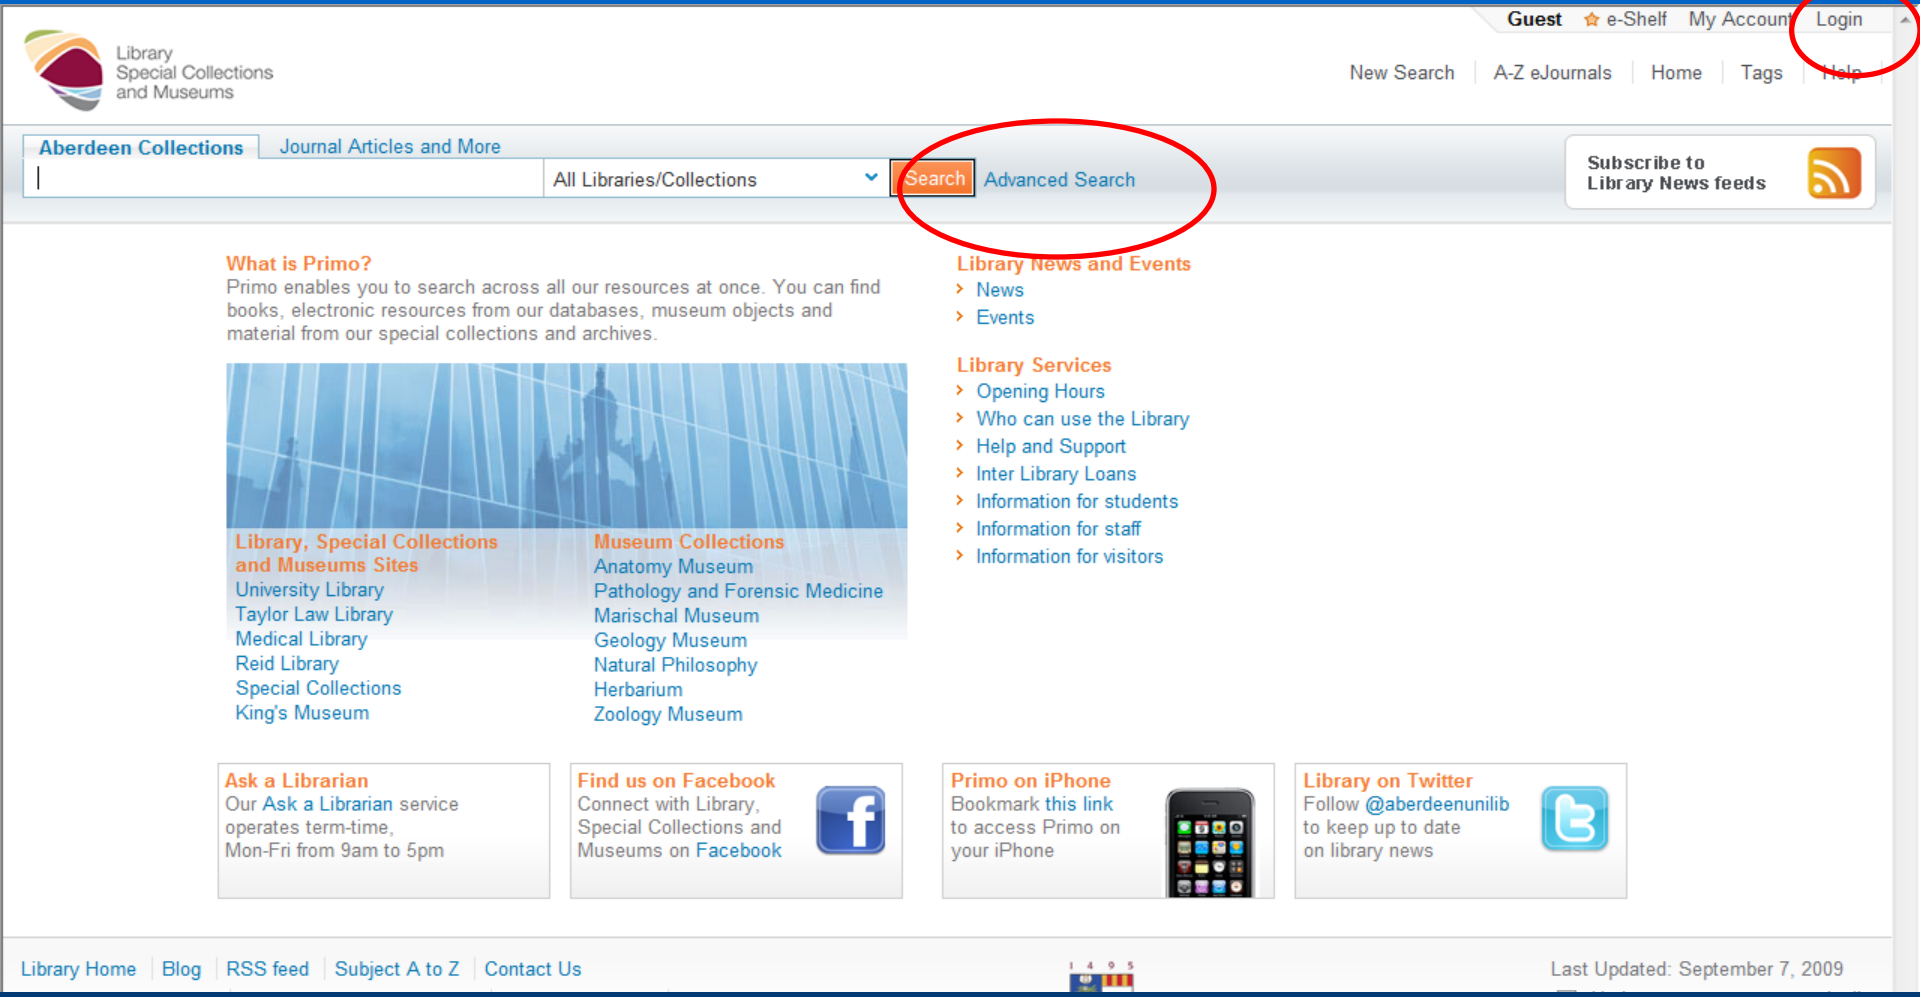
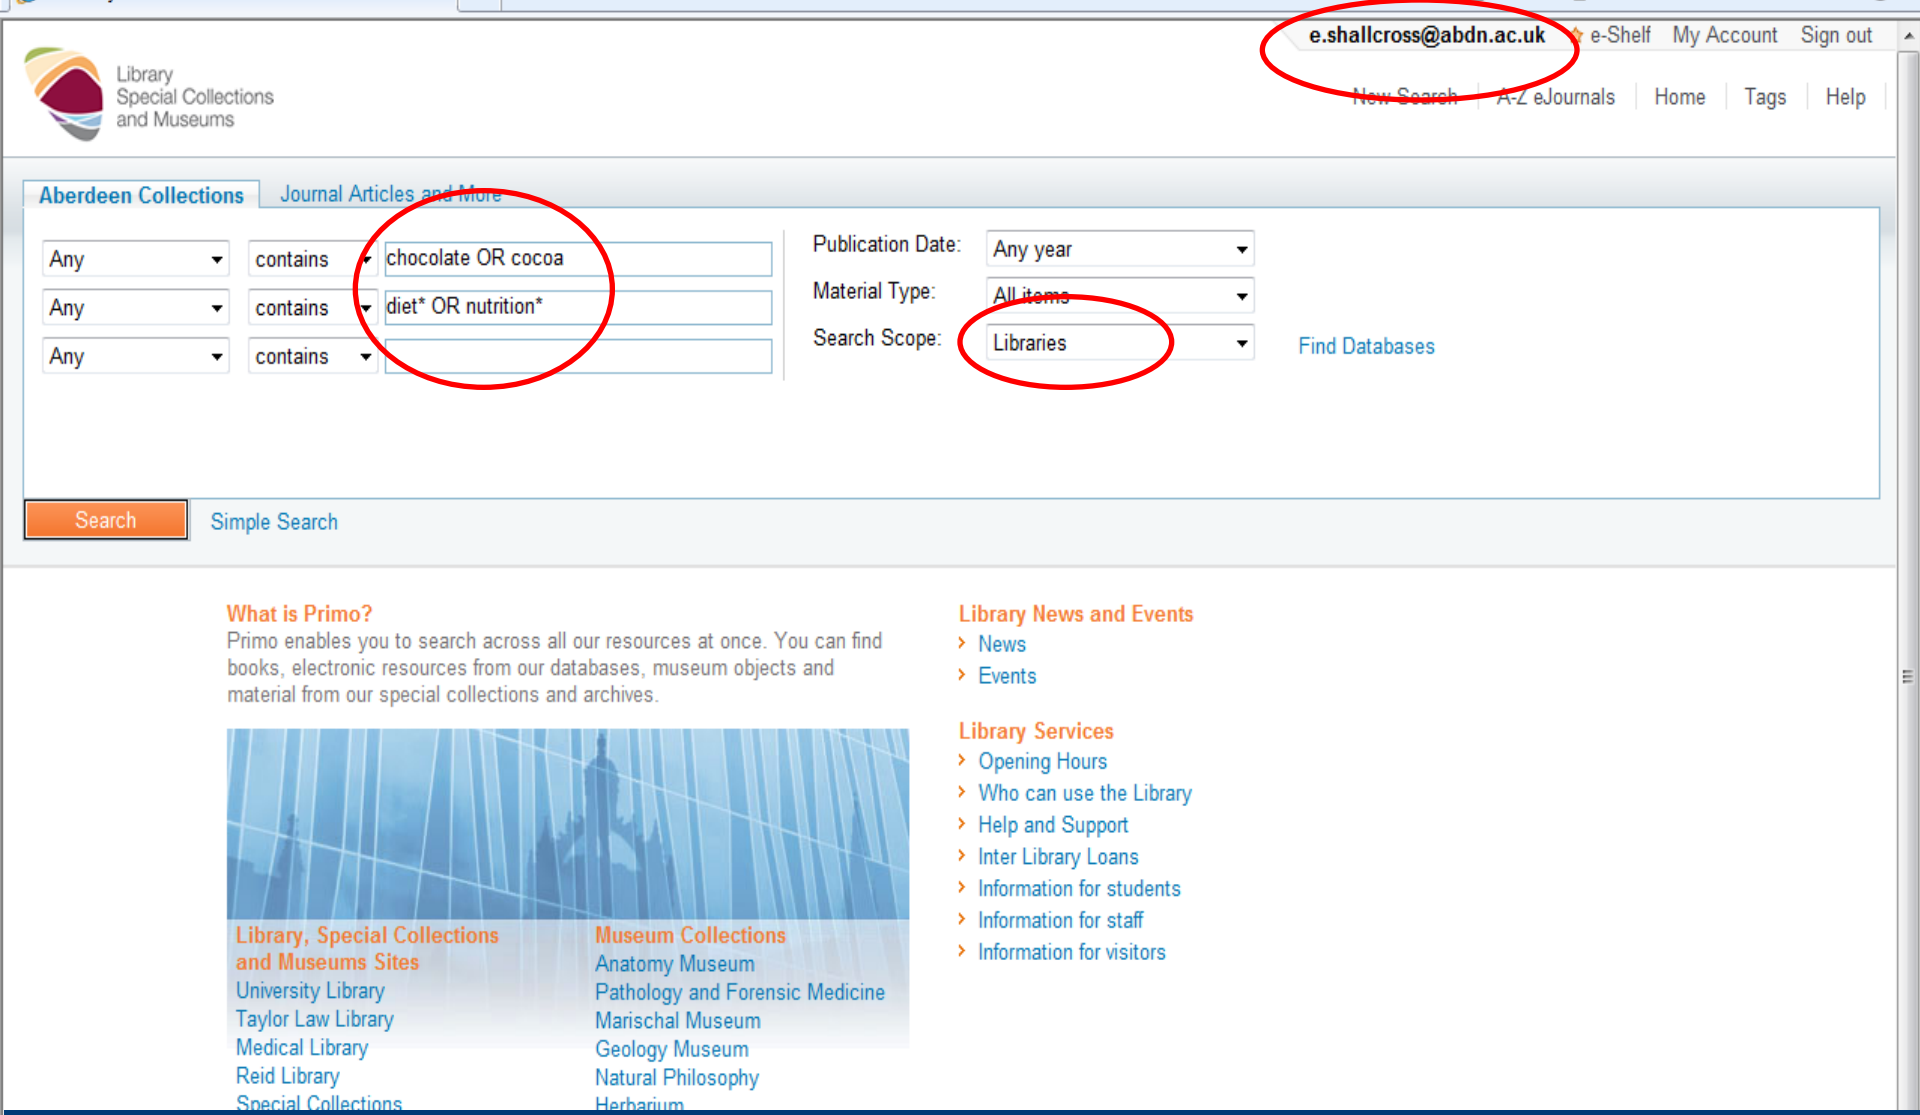
# Primo

## login using your computer username and password

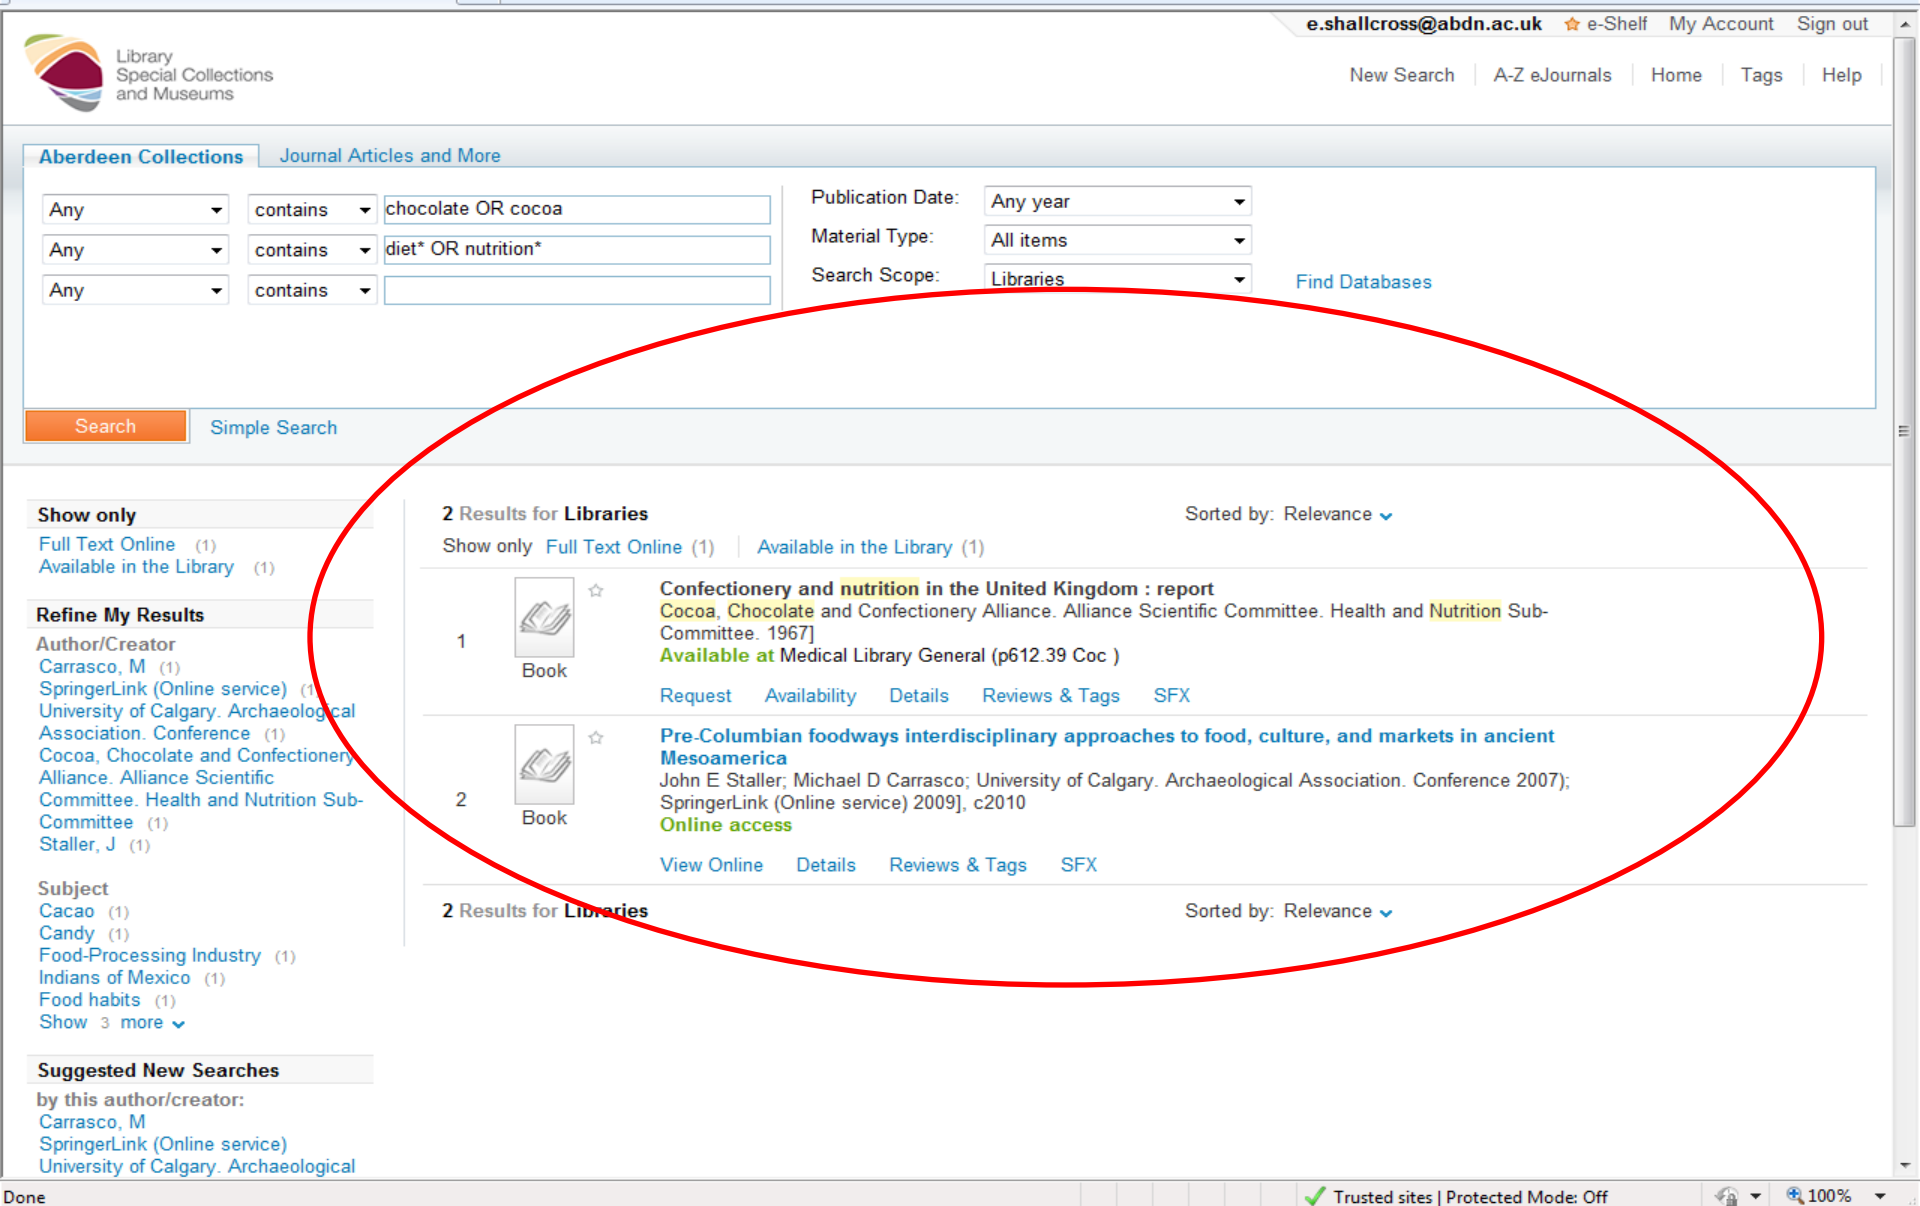


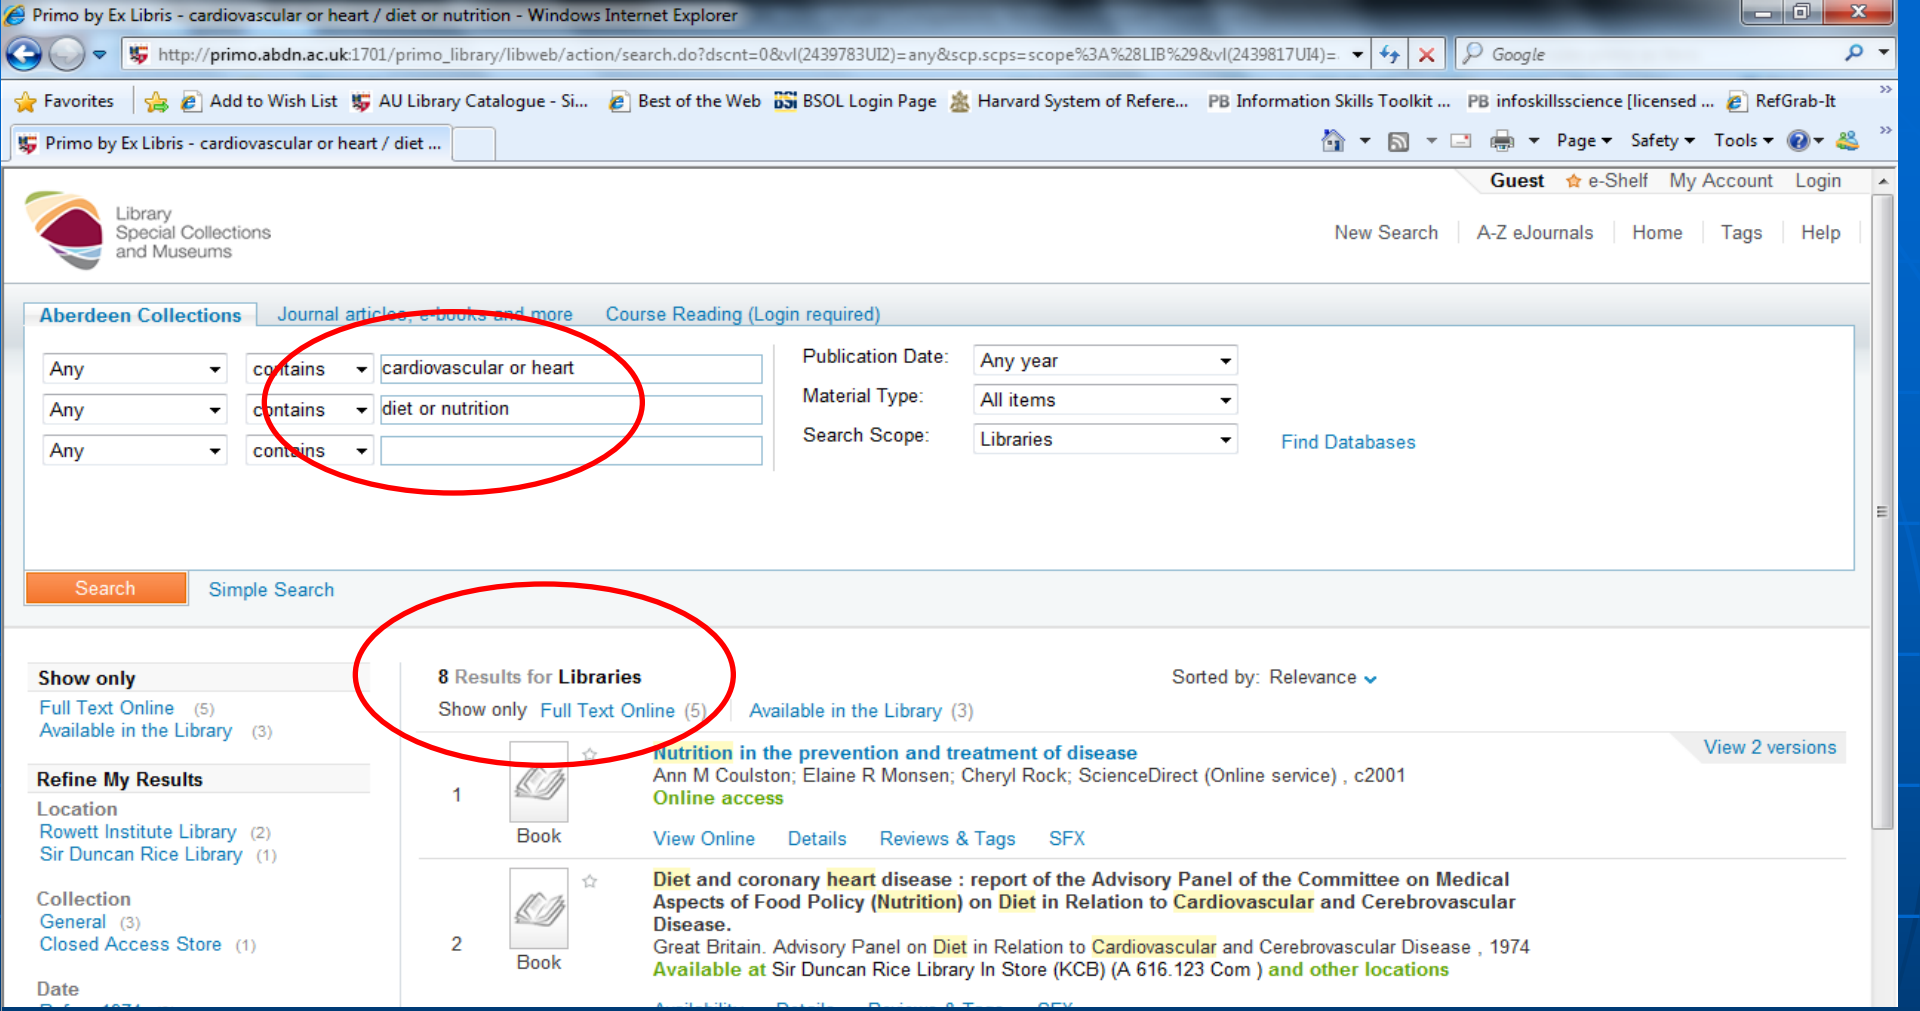
## Don’t be too specific when you search Primo – you may not find much!



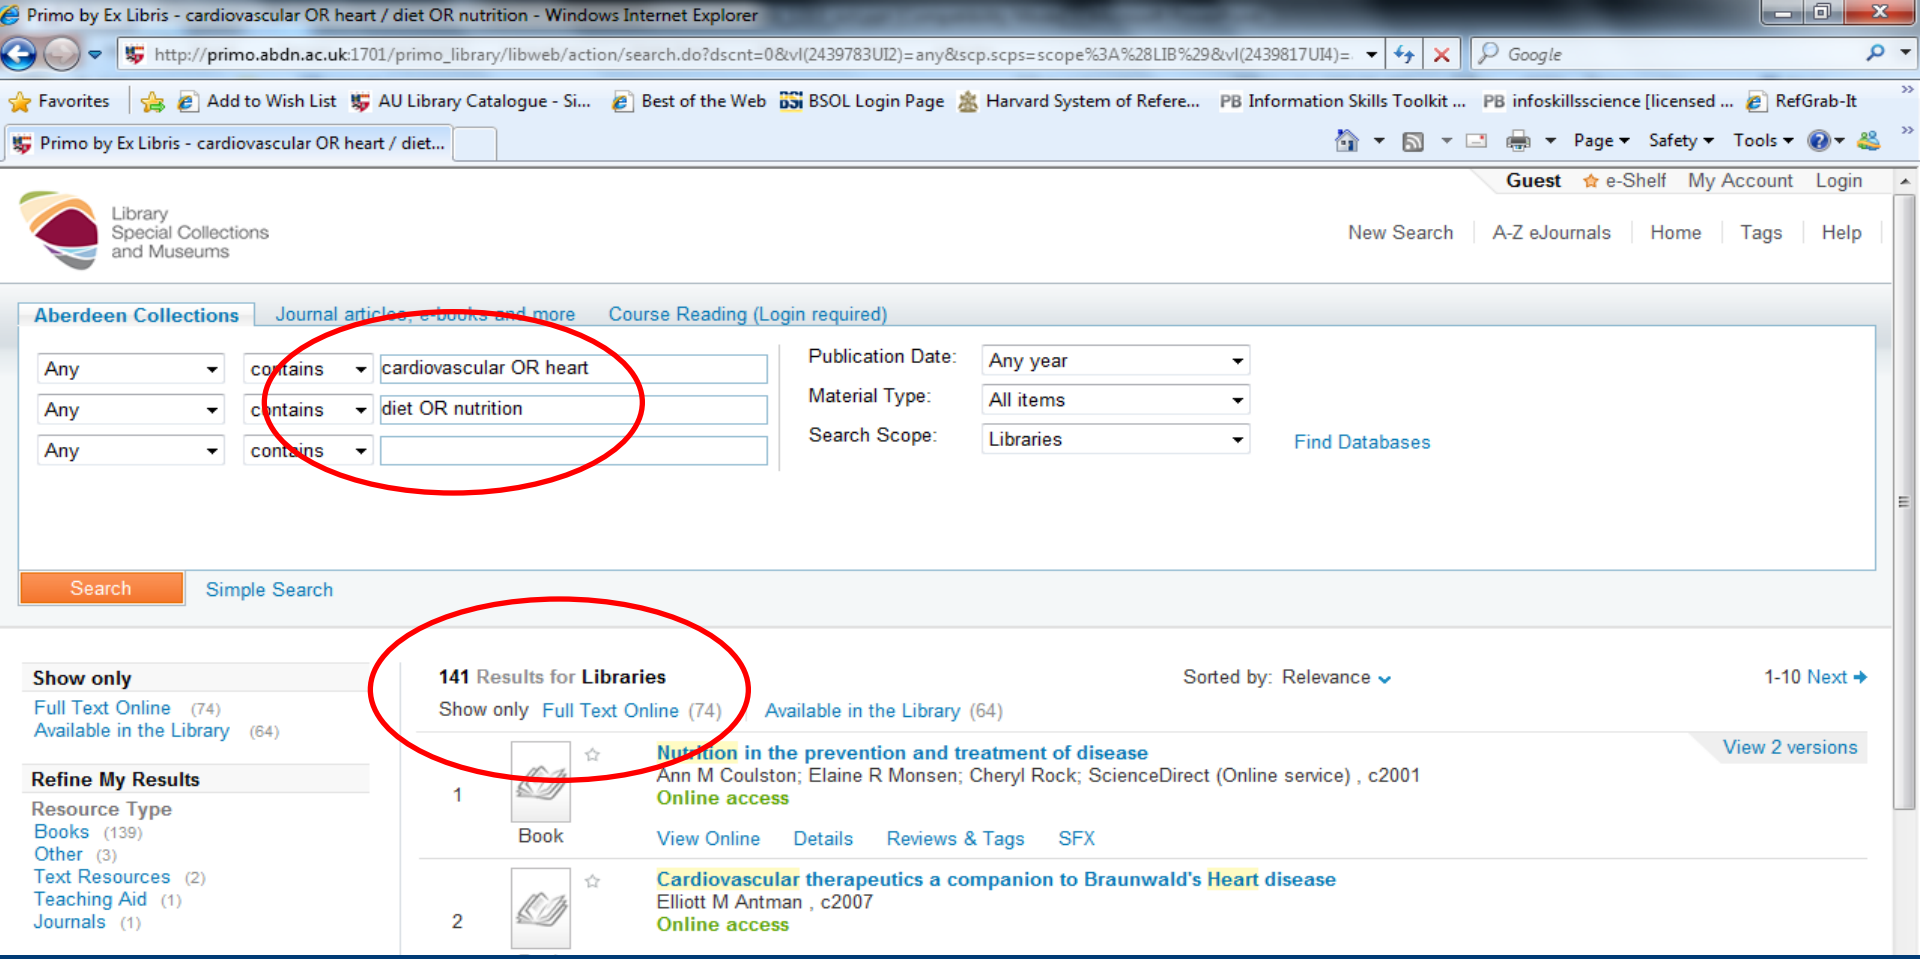
**Note the Boolean operators are in capital letters – if you don't use capitals you;" get the wrong results!**

# Only 2 books – 1 electronic (2010) and 1 very old (1967)



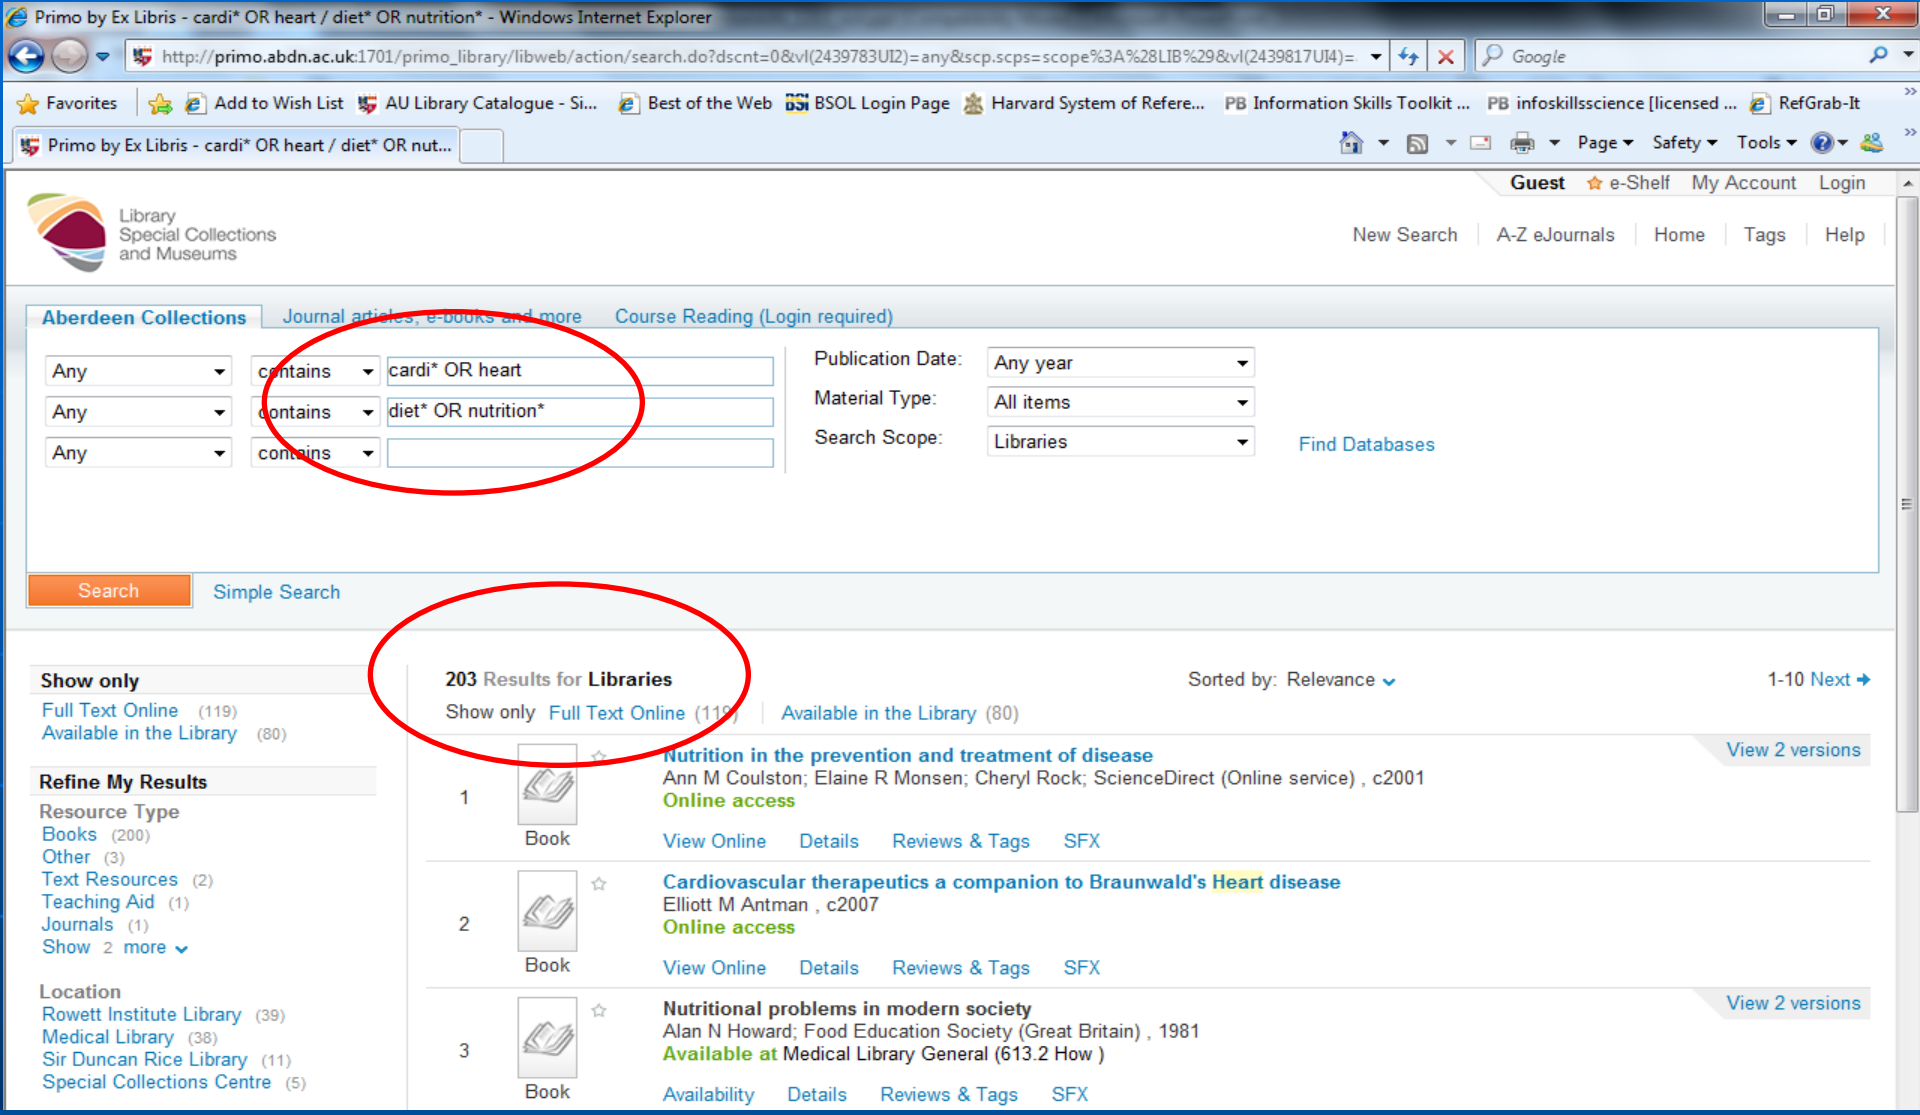


# I broaden my search terms to see if I can find more... but I forget to apply Primo search rules e.g. do not use capital letters for Boolean OR



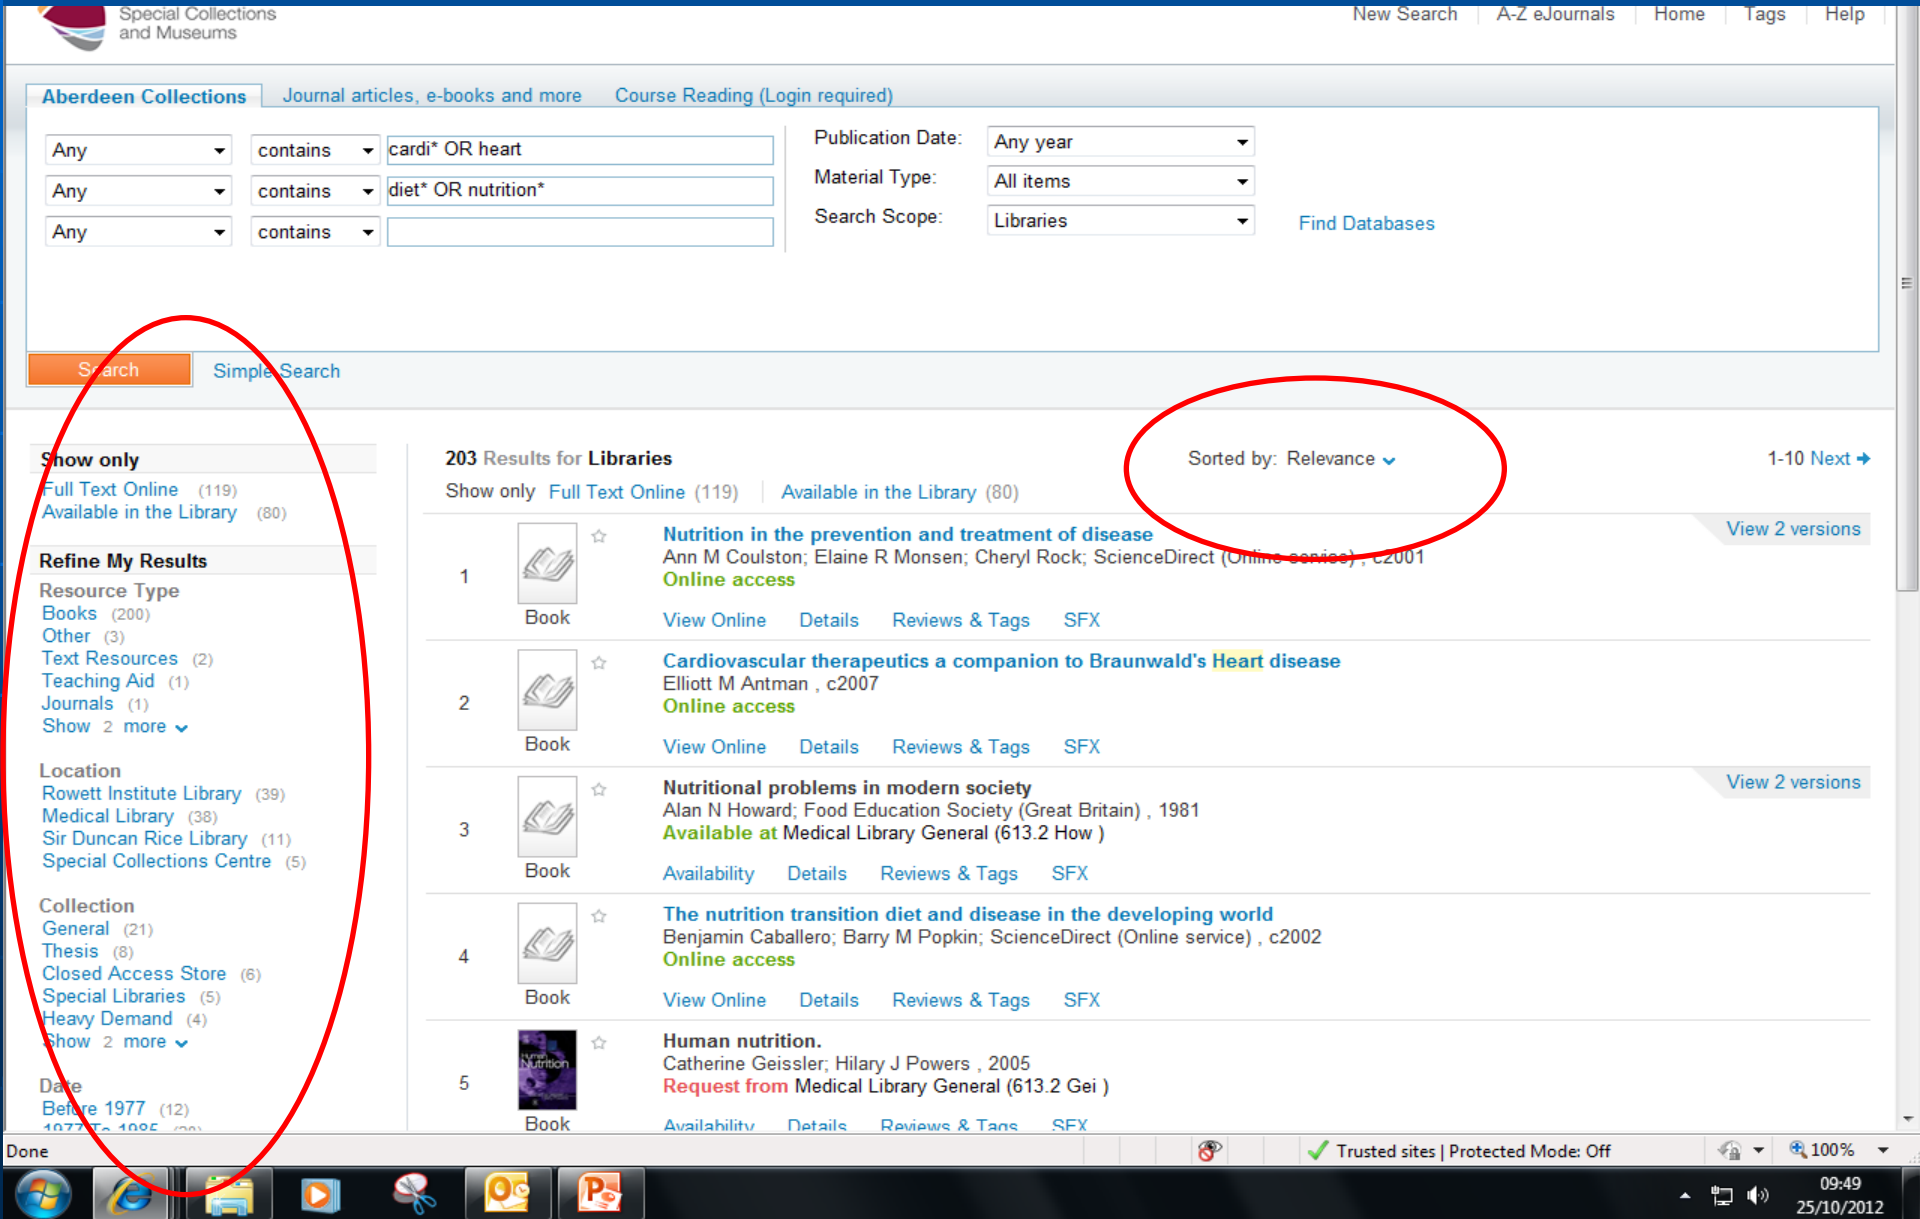
# Correct this - use capital letters for Boolean OR

# 141 results instead of 8 – search rules do matter!



**Apply Primo search rules further e.g. use the * truncation symbol and you can significantly increase the number of results**

# Can change sort order and use other means of refining your results e.g. by format



# Finding information to support your research – known JOURNAL references

### Abstract

**Background:** Flavanol-rich chocolate and lycopene-rich tomato extract have attracted interest as potential alternative treatment options for hypertension, a known risk factor for cardiovascular morbidity and mortality. Treatment of prehypertension (SBP 120–139/DBP 80–89 mmHg) may forestall progression to hypertension. However, there has been only limited research into non-pharmacological treatment options for prehypertension. We investigated the effect of dark chocolate or tomato extract on blood pressure, and their acceptability as an ongoing treatment option in a prehypertensive population.

**Methods:** Our trial consisted of two phases: a randomised controlled three-group-parallel trial over 12 weeks (phase 1) followed by a crossover of the two active treatment arms over an additional 12-week period (phase 2). Group 1 received a 50 g daily dose of dark chocolate with 70% cocoa containing 750 mg polyphenols, group 2 were allocated one tomato extract capsule containing 15 mg lycopene per day, and group 3 received one placebo capsule daily over 8 weeks followed by a 4-week washout period. In phase 2 the active treatment groups were crossed over to receive the alternative treatment. Median blood

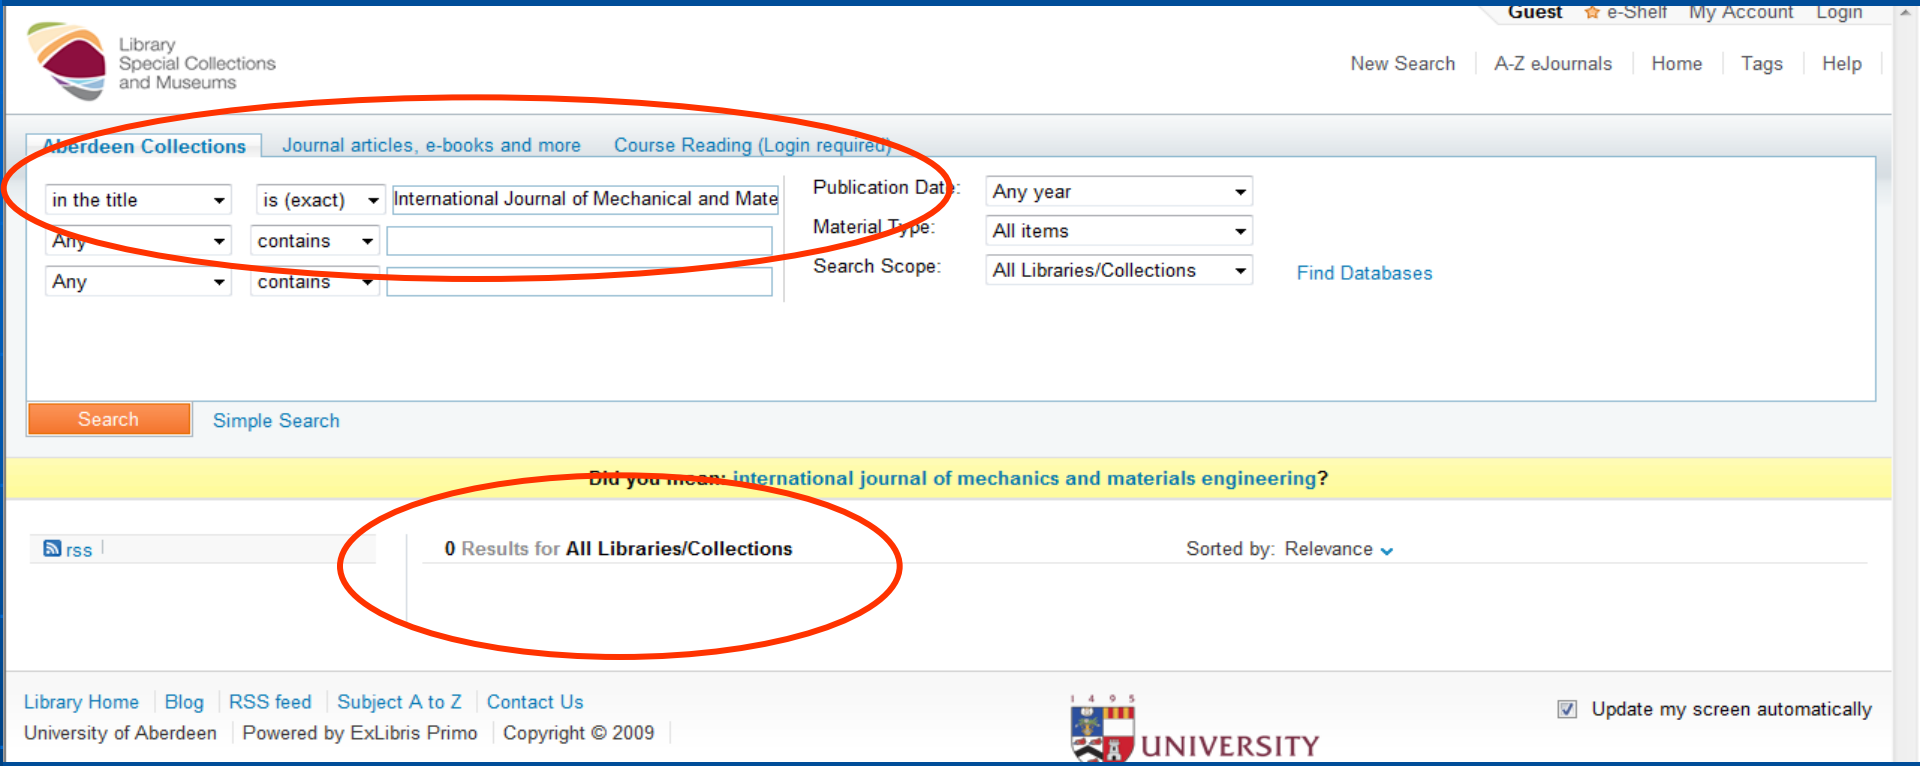
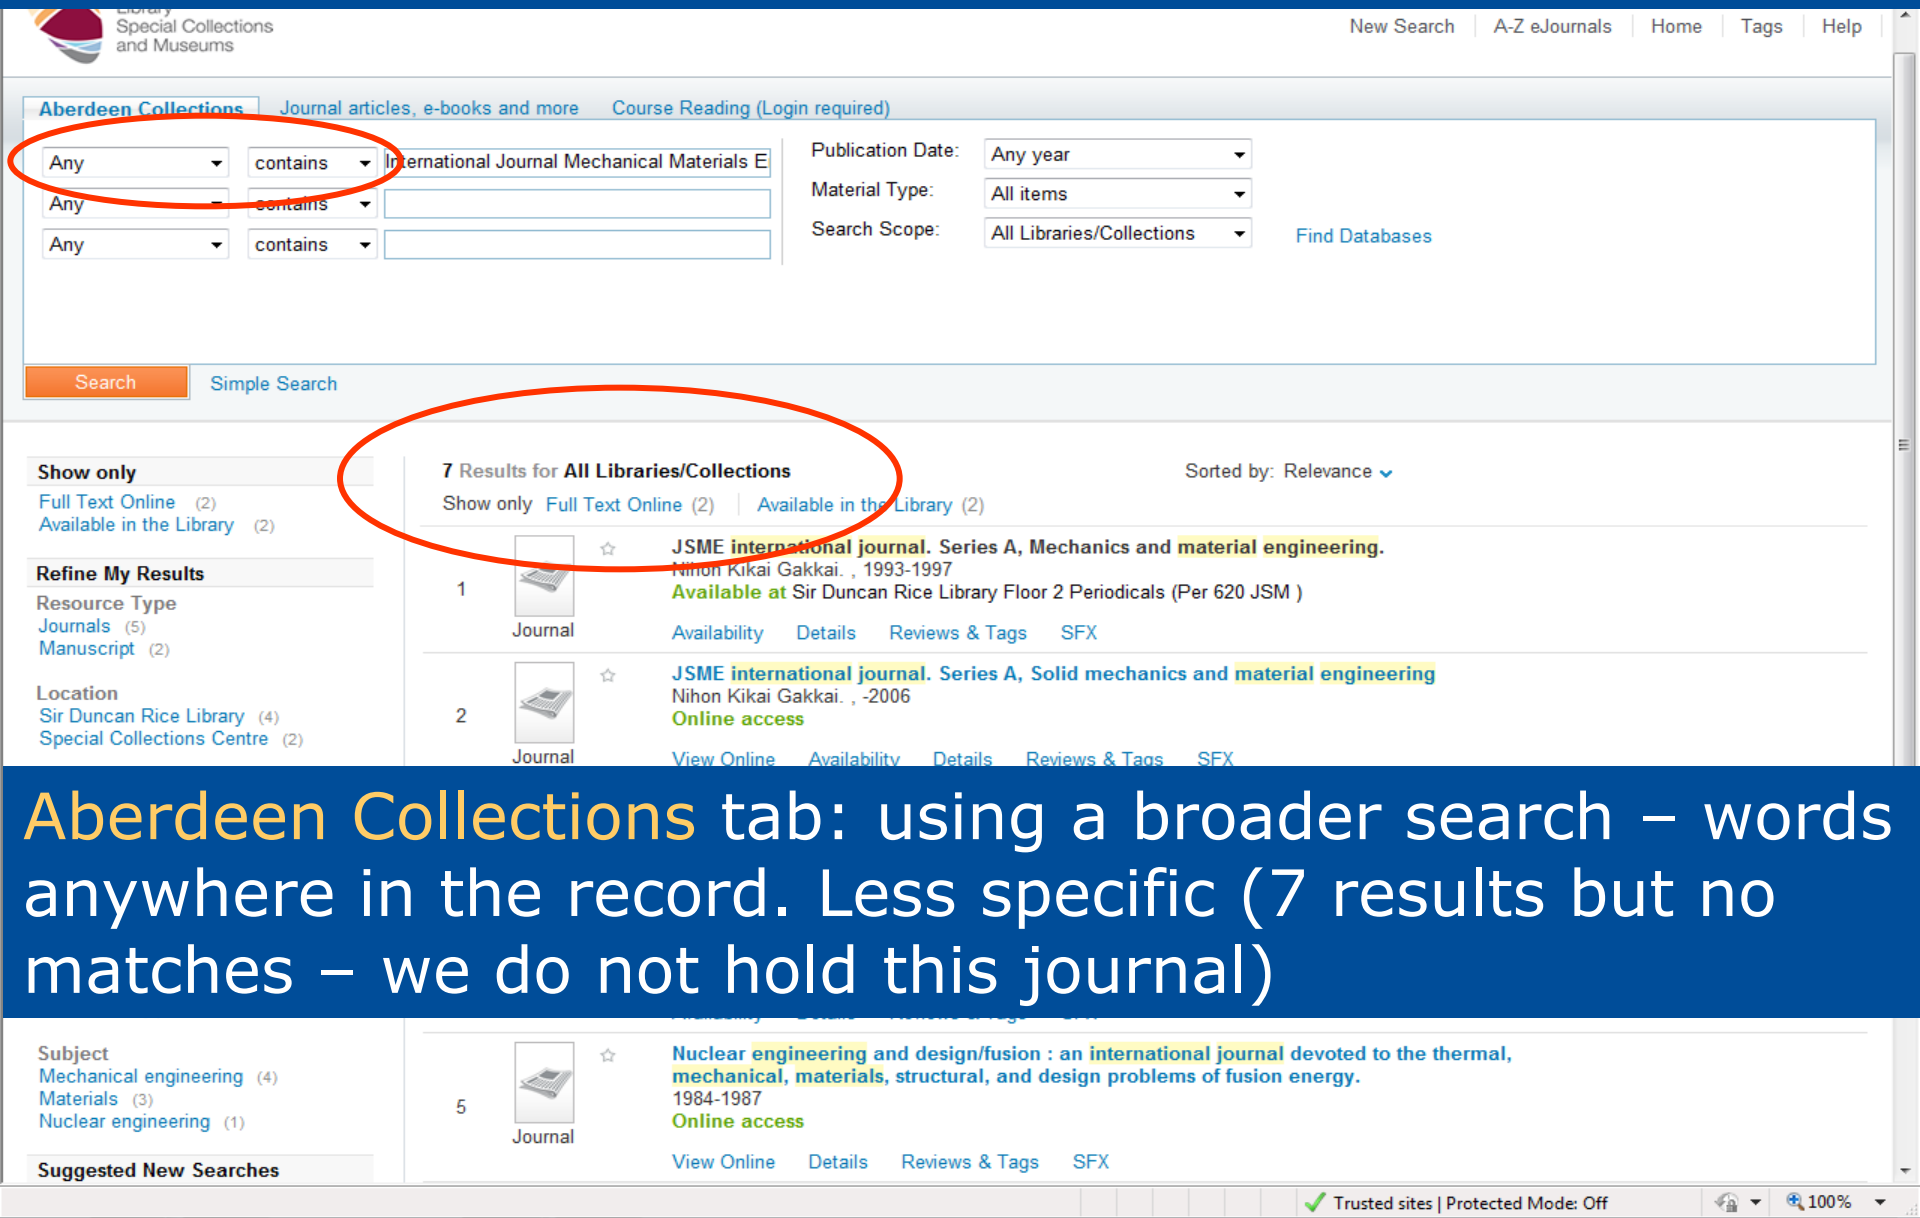
# Do we have a subscription to the International Journal of Mechanical and Materials Engineering?



# Aberdeen Collections tab: using exact title words search. This is very specific

# Do we have a subscription to the International Journal of Mechanical and Materials Engineering?



Aberdeen Collections tab: using a broader search – words anywhere in the record. Less specific (7 results but no matches – we do not hold this journal)

# Primo Central and Journal articles, e-books and more tab

- Not perfect!
- Good for quick checks using title of article
- If you get no hits then you should re-do your search using Aberdeen Collections tab and title of journal
- PhD level – do not use Journal Articles, e-books and more as a database – not good enough for what you need!!

© Library, Special Collections & Museums, 2012/13

# Beyond our holdings – other institutions

- In Arts/Humanities with strong dependence on book material perhaps need to widen your search sphere to other organisations
- Use Primo – Find Databases option to access other library catalogues:
  - British Library Catalogue
  - COPAC (union catalogue of >20 major university research libraries in the UK and Ireland *plus* the British Library, the National Library of Scotland, and the National Library of Wales).
  - National Library of Scotland
  - Robert Gordon University Catalogue

© Library, Special Collections & Museums, 2012/13

Nonuniformity in the course of fermentation

Rewetting, polishing, and drying raw cocoa are practiced locally to improve the external appearance, especially of moldy beans, but shell breaking and reinfection of the nibs may result. Rewetting also increases browning of violet beans.

After drying, the raw cocoa is sorted by removing flat, broken, externally moldy beans and foreign matter and by sieving (in the case of nonuniform bean size) to meet the quality standards. Locally, batches from different origins may be blended to reach the maximum percentage of the particular visible bean defects which are allowed in the official grading system.

### Storage

Provided there are good storage conditions, properly processed raw cocoa can be stored for years without

Can download or print full text for your own research/study purposes

If you use information/ideas remember to acknowledge these in your bibliography

According to moisture absorption isotherms, this bean moisture would not be exceeded at < 80% relative humidity. However, at a high level of air humidity, any reduction in air temperature (e.g., during shipping) would cause damage by water condensation and mold growth. Residual humidity

found in temperate climates. In tropical countries, insects are controlled by fumigation of raw cocoa using the gases methyl bromide or phosphine applied to stacks of stored cocoa under a gas-proof and waterproof polythene sheet for 1.5 h. The gas is then extracted by fans. The sheets are left to protect the cocoa against uptake of moisture and insects. (*See* Fumigants; Insect Pests: Problems Caused by Insects and Mites.)

## Production of Cocoa Powder and Semifinished Products

### Cocoa Products

Two products are derived solely from cocoa beans: chocolate and cocoa powder. These products are

800

**Figure 4** Products derived from cocoa beans. The figures are approximate and in 1000 tonnes. Reproduced from Cocoa: Production, Products and Uses. *Encyclopaedia of Food Science, Food Technology and Nutrition*, Macrae R, Robinson RK and Sadler MJ (eds), 1993, Academic Press.

# Other E-book Collections: Springer

**Get started now with four easy steps:**

1. Enter your subscriber information.

**Your Name:**

**Email Address:**

**Login Name:**

**Area of Focus:** Select your focus area

**Type of User:** Select your user type

**Password:**

**Re-enter Password:**

2. Create a database by automatically importing data from online services or by typing references in manually.
3. Create a paper in your word processor inserting reference ID numbers in the locations you want to cite references. Save and close the file.
4. From RefWorks select Bibliography, Create and browse and locate the paper to format. Select the output style you want to use. Click Create Bibliography and save your formatted paper to your computer.

That's it...your paper is formatted correctly and the bibliography automatically created.

# Creating your Records

Getting records into your RefWorks personal database depends on the database that you are using

- Importing in a one-step process, e.g. Scopus
- Importing using a two-step process and a .txt file
- Manual input

© Library, Special Collections & Museums, 2012/13

# Importing Records: 1-step process

A button in the database saves records directly to RefWorks

e.g. Scopus at www.scopus.com

© Library, Special Collections & Museums, 2012/13

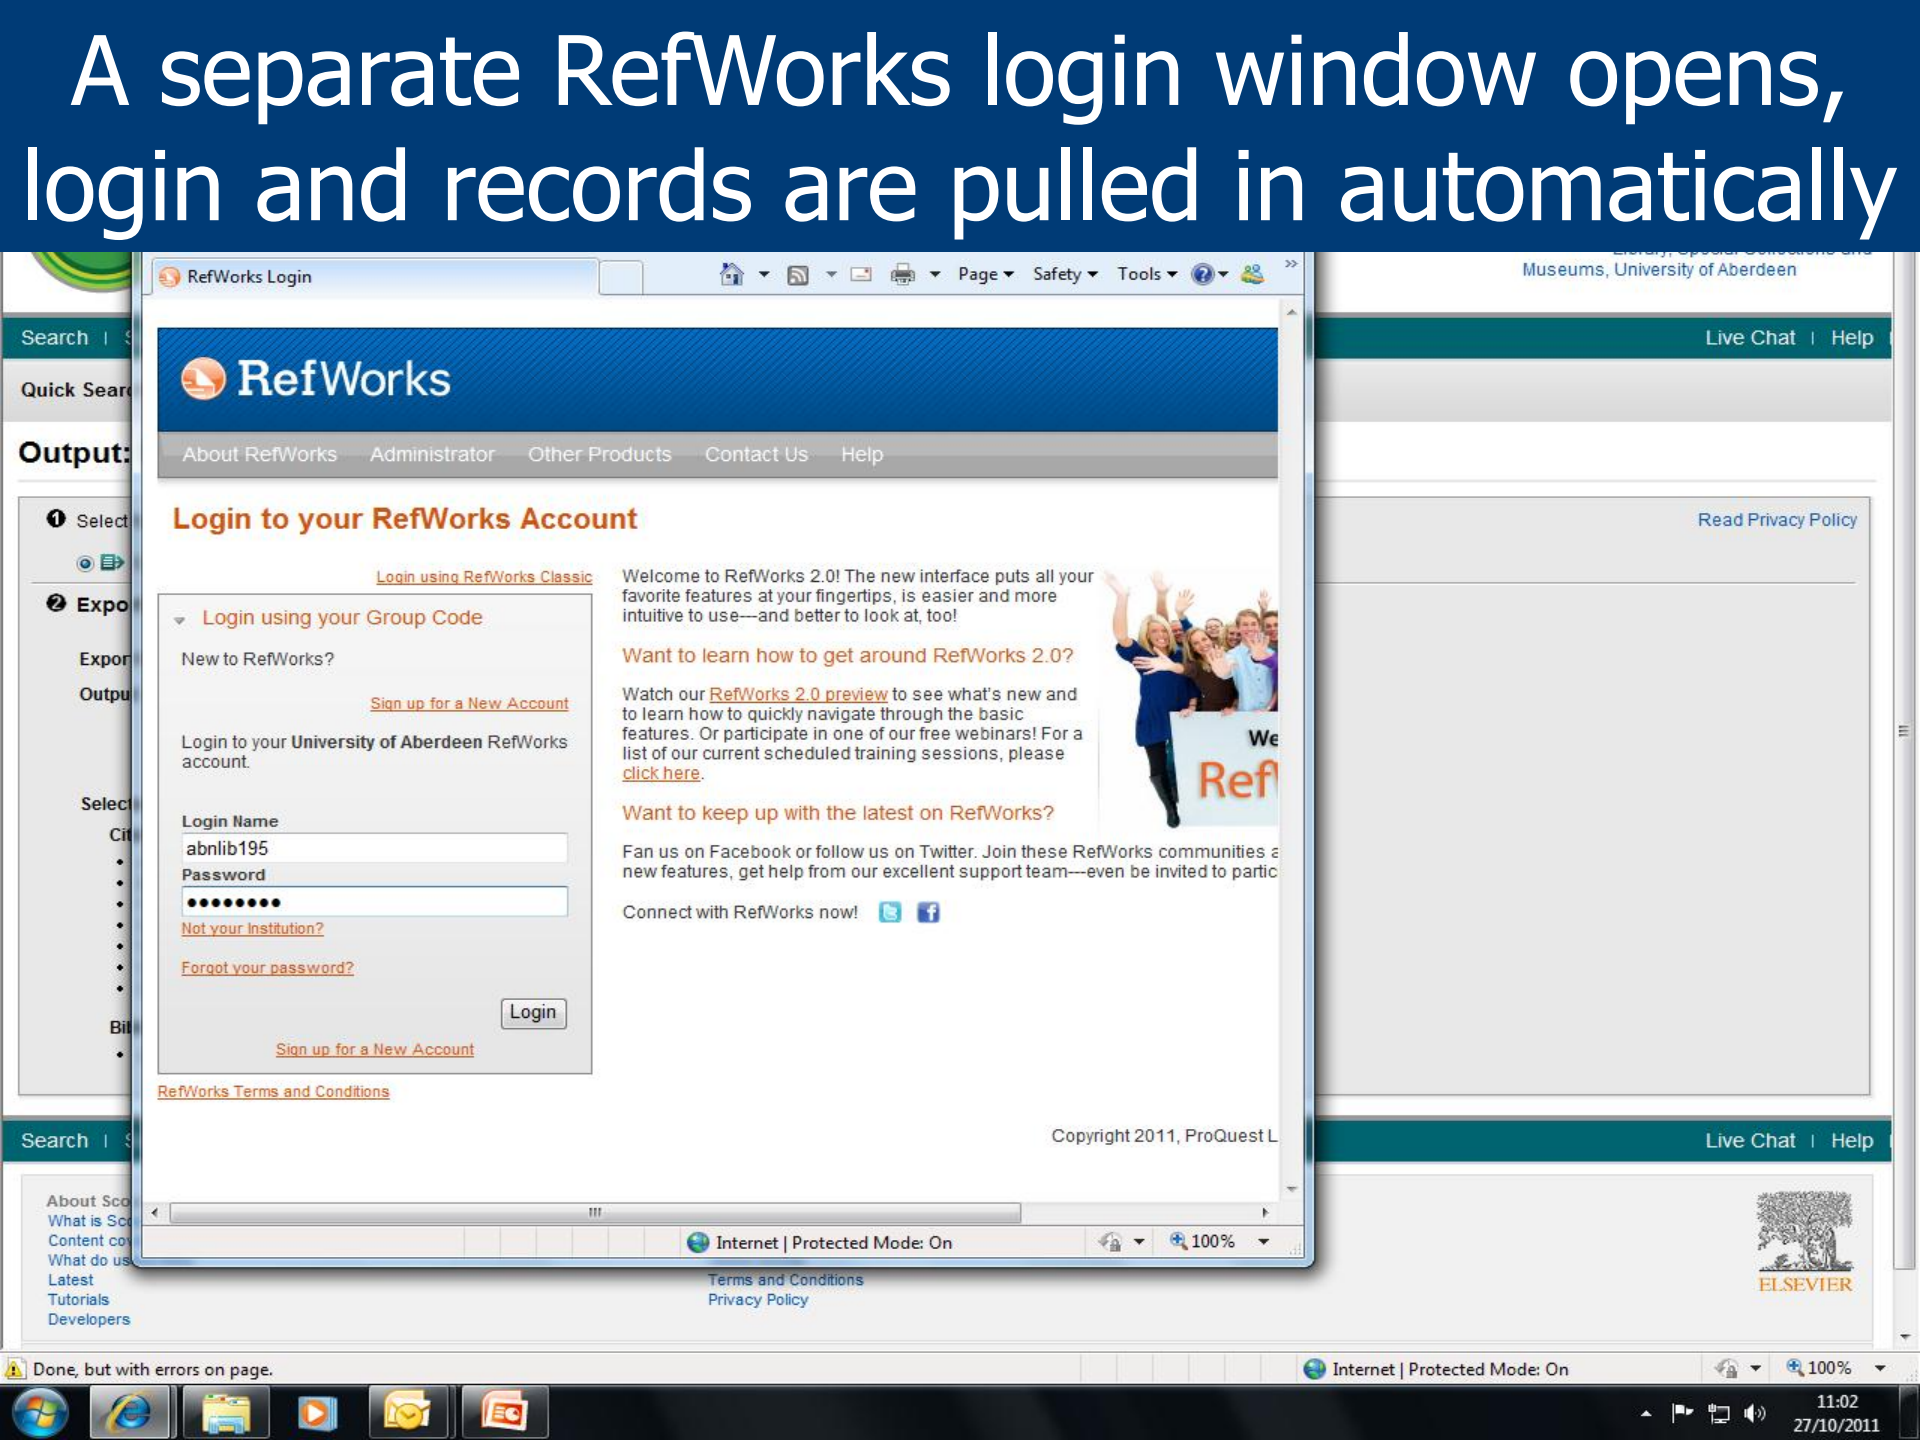
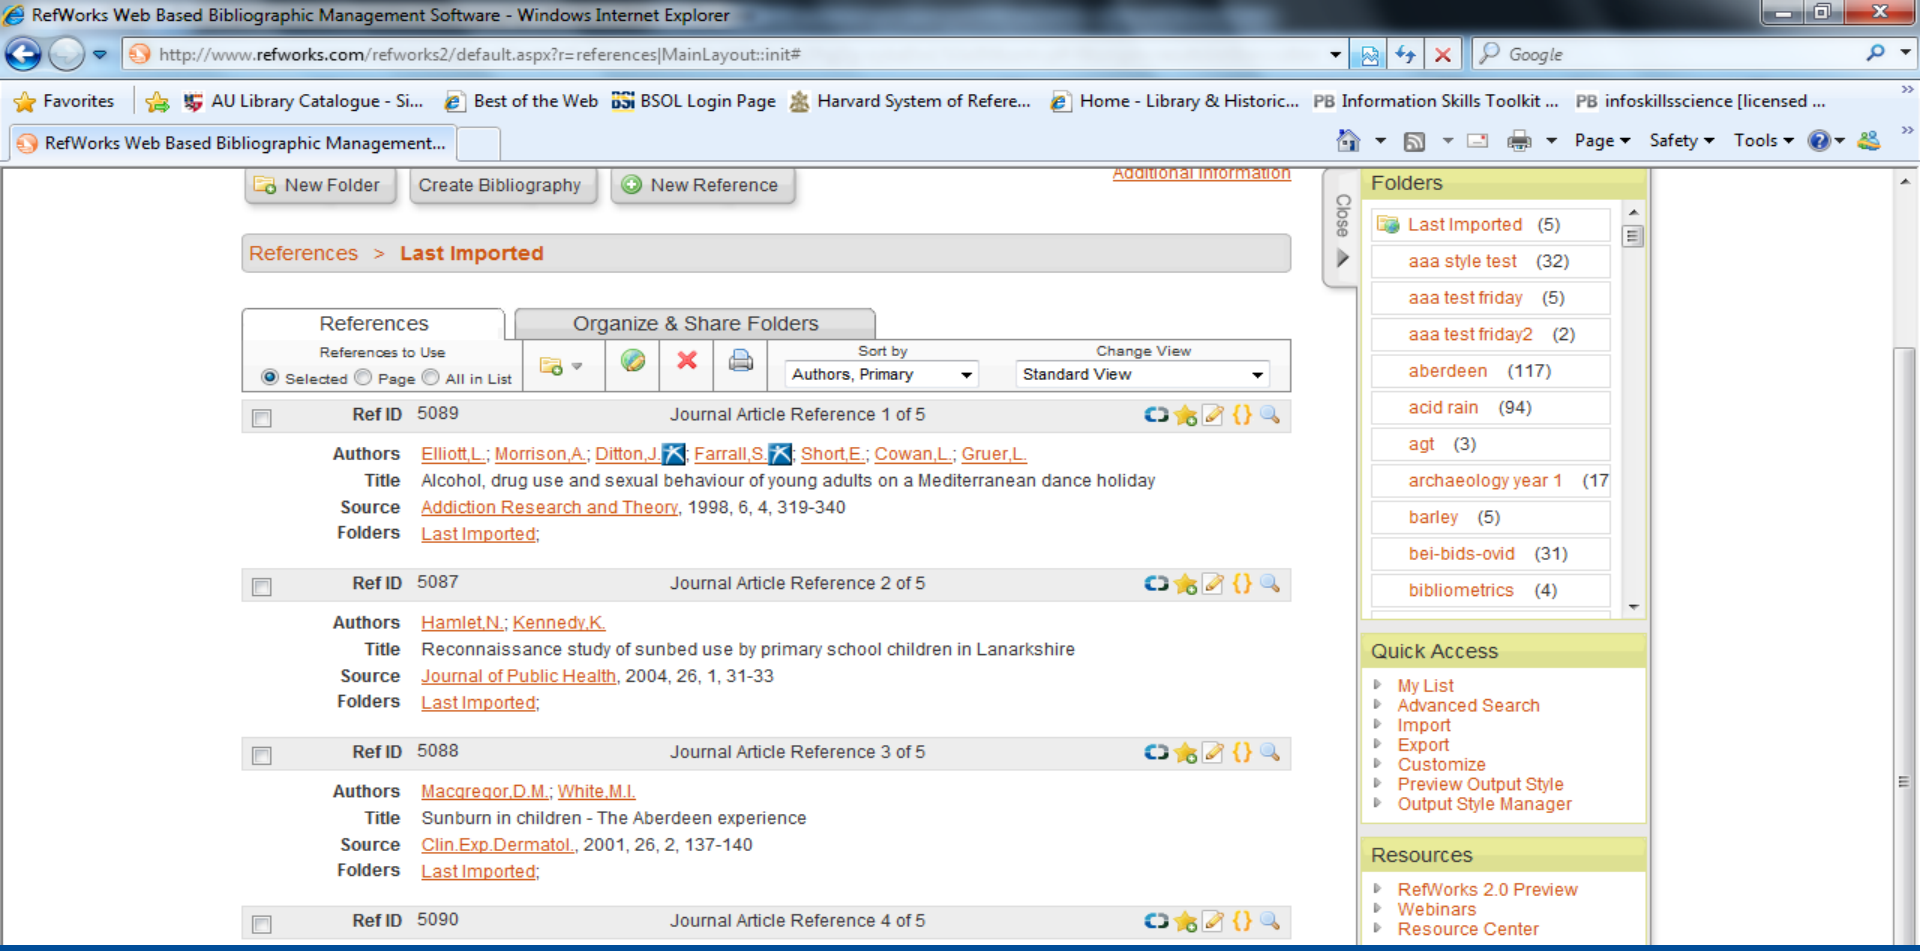
# A separate RefWorks login window opens, login and records are pulled in automatically



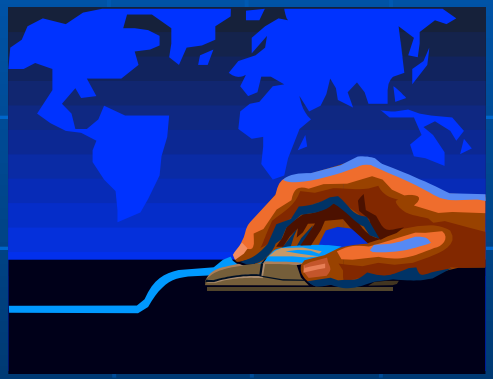


**Only a taster of what RefWorks can do.**

**What now?**

**Follow instructions in handout to set up a RefWorks account – may be of use in the next part of the workshop when we look at databases**

# Successful searching: using databases...



Susan McCourt

©Library & Historic Collections, 2012/13

# Why use databases?

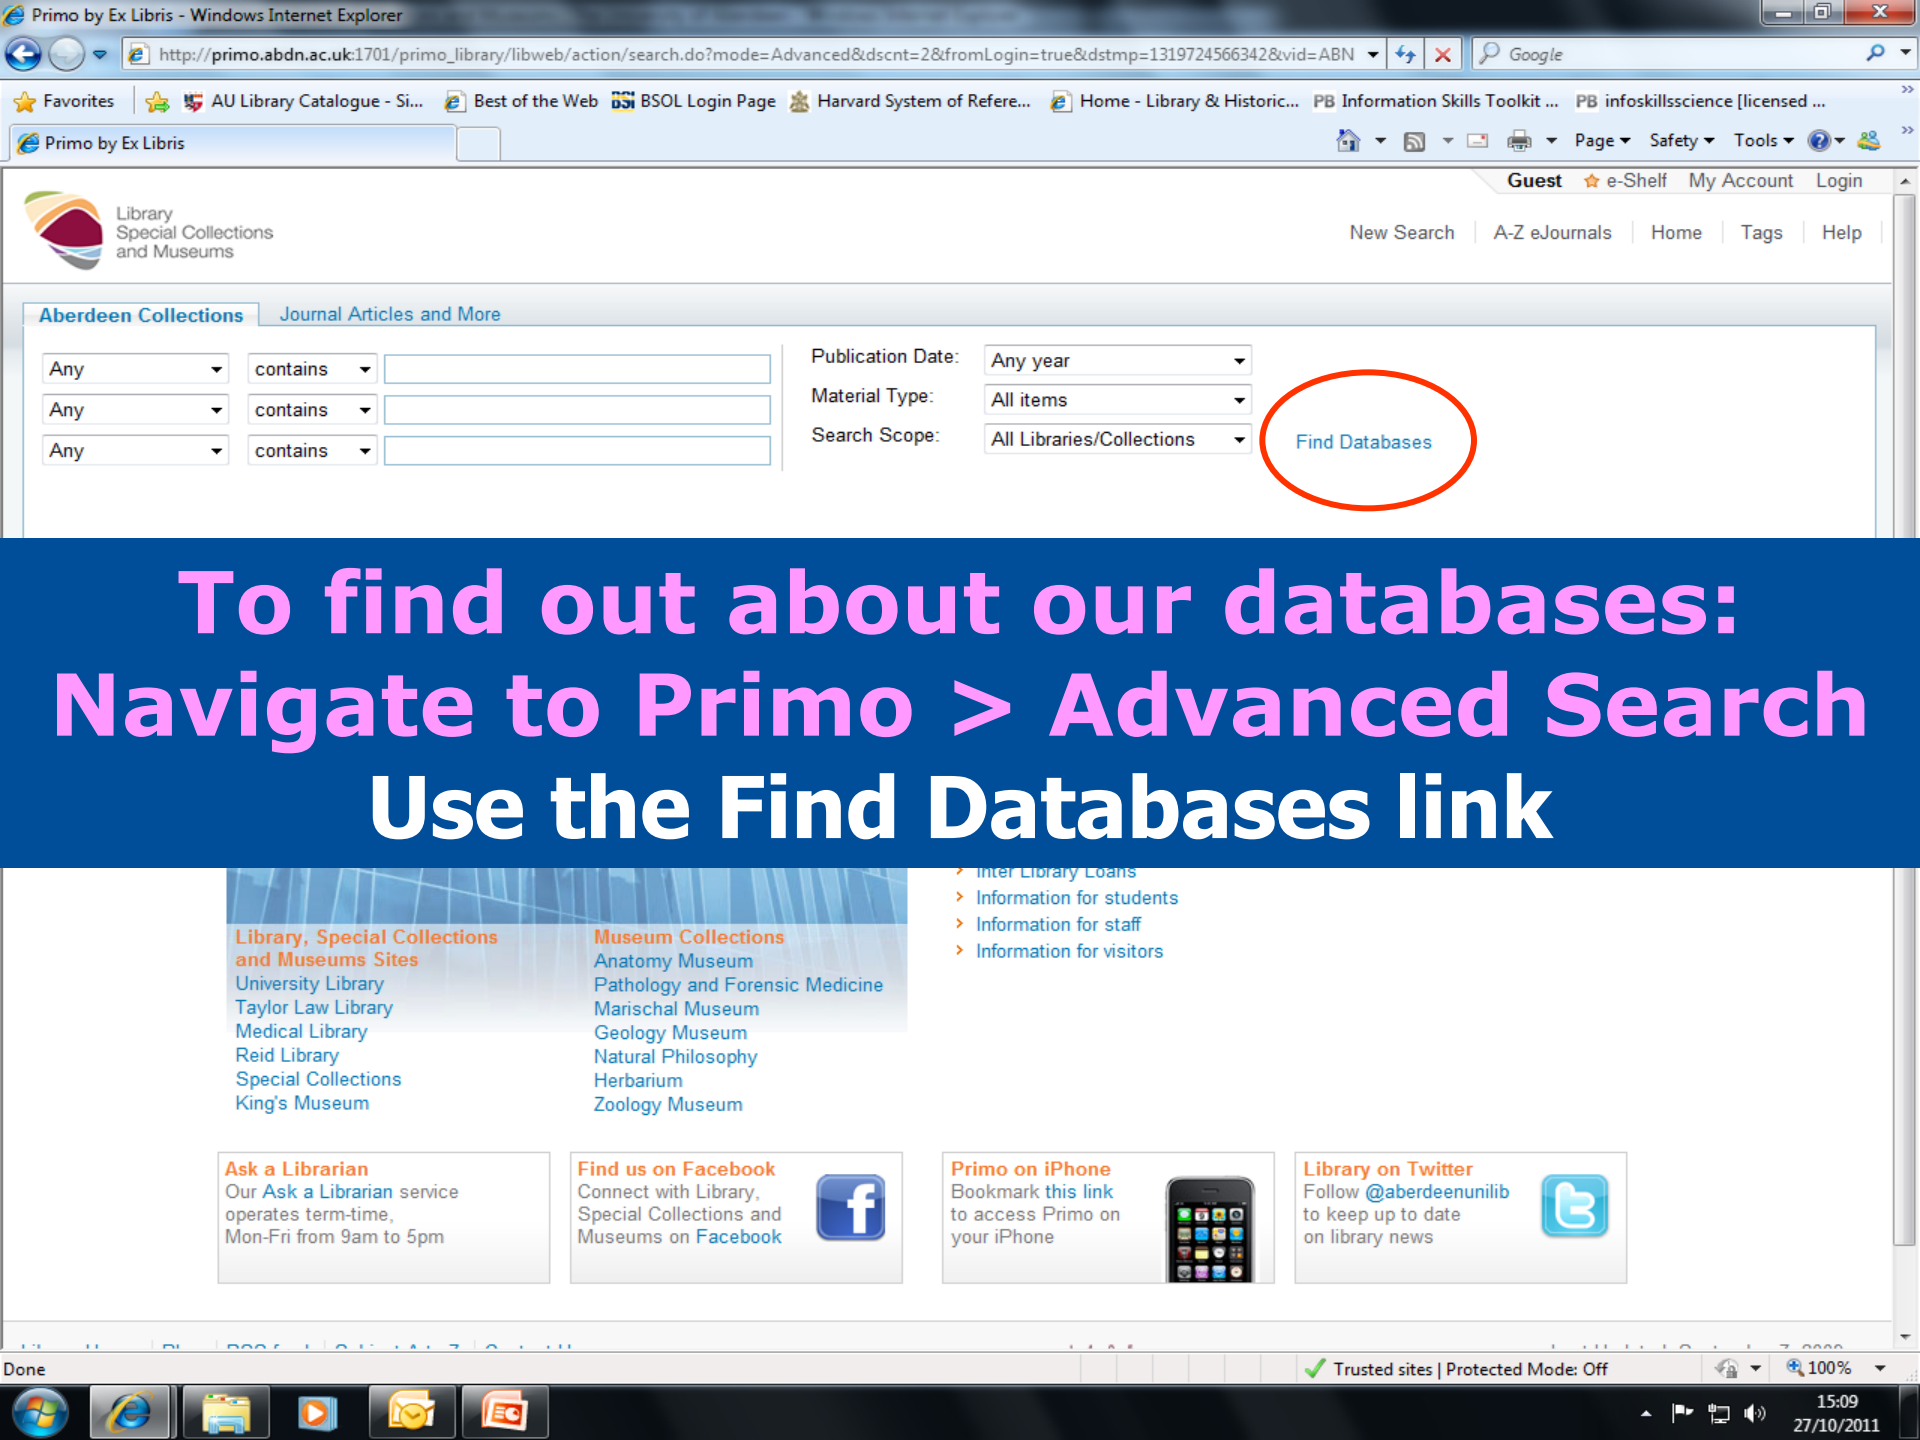
- Essential for access to material published in journal/periodicals
- Contain academic and scholarly material
- Results of refereed research from institutions worldwide
- Content is authoritative
- Referring to published research literature demonstrates that you are on top of your subject area

© Library, Special Collections & Museums, 2012/13

Q. How do I find out what databases are available for my subject interest?

A. Use Primo – Find Databases

© Library, Special Collections & Museums, 2012/13



Primo by Ex Libris - Windows Internet Explorer

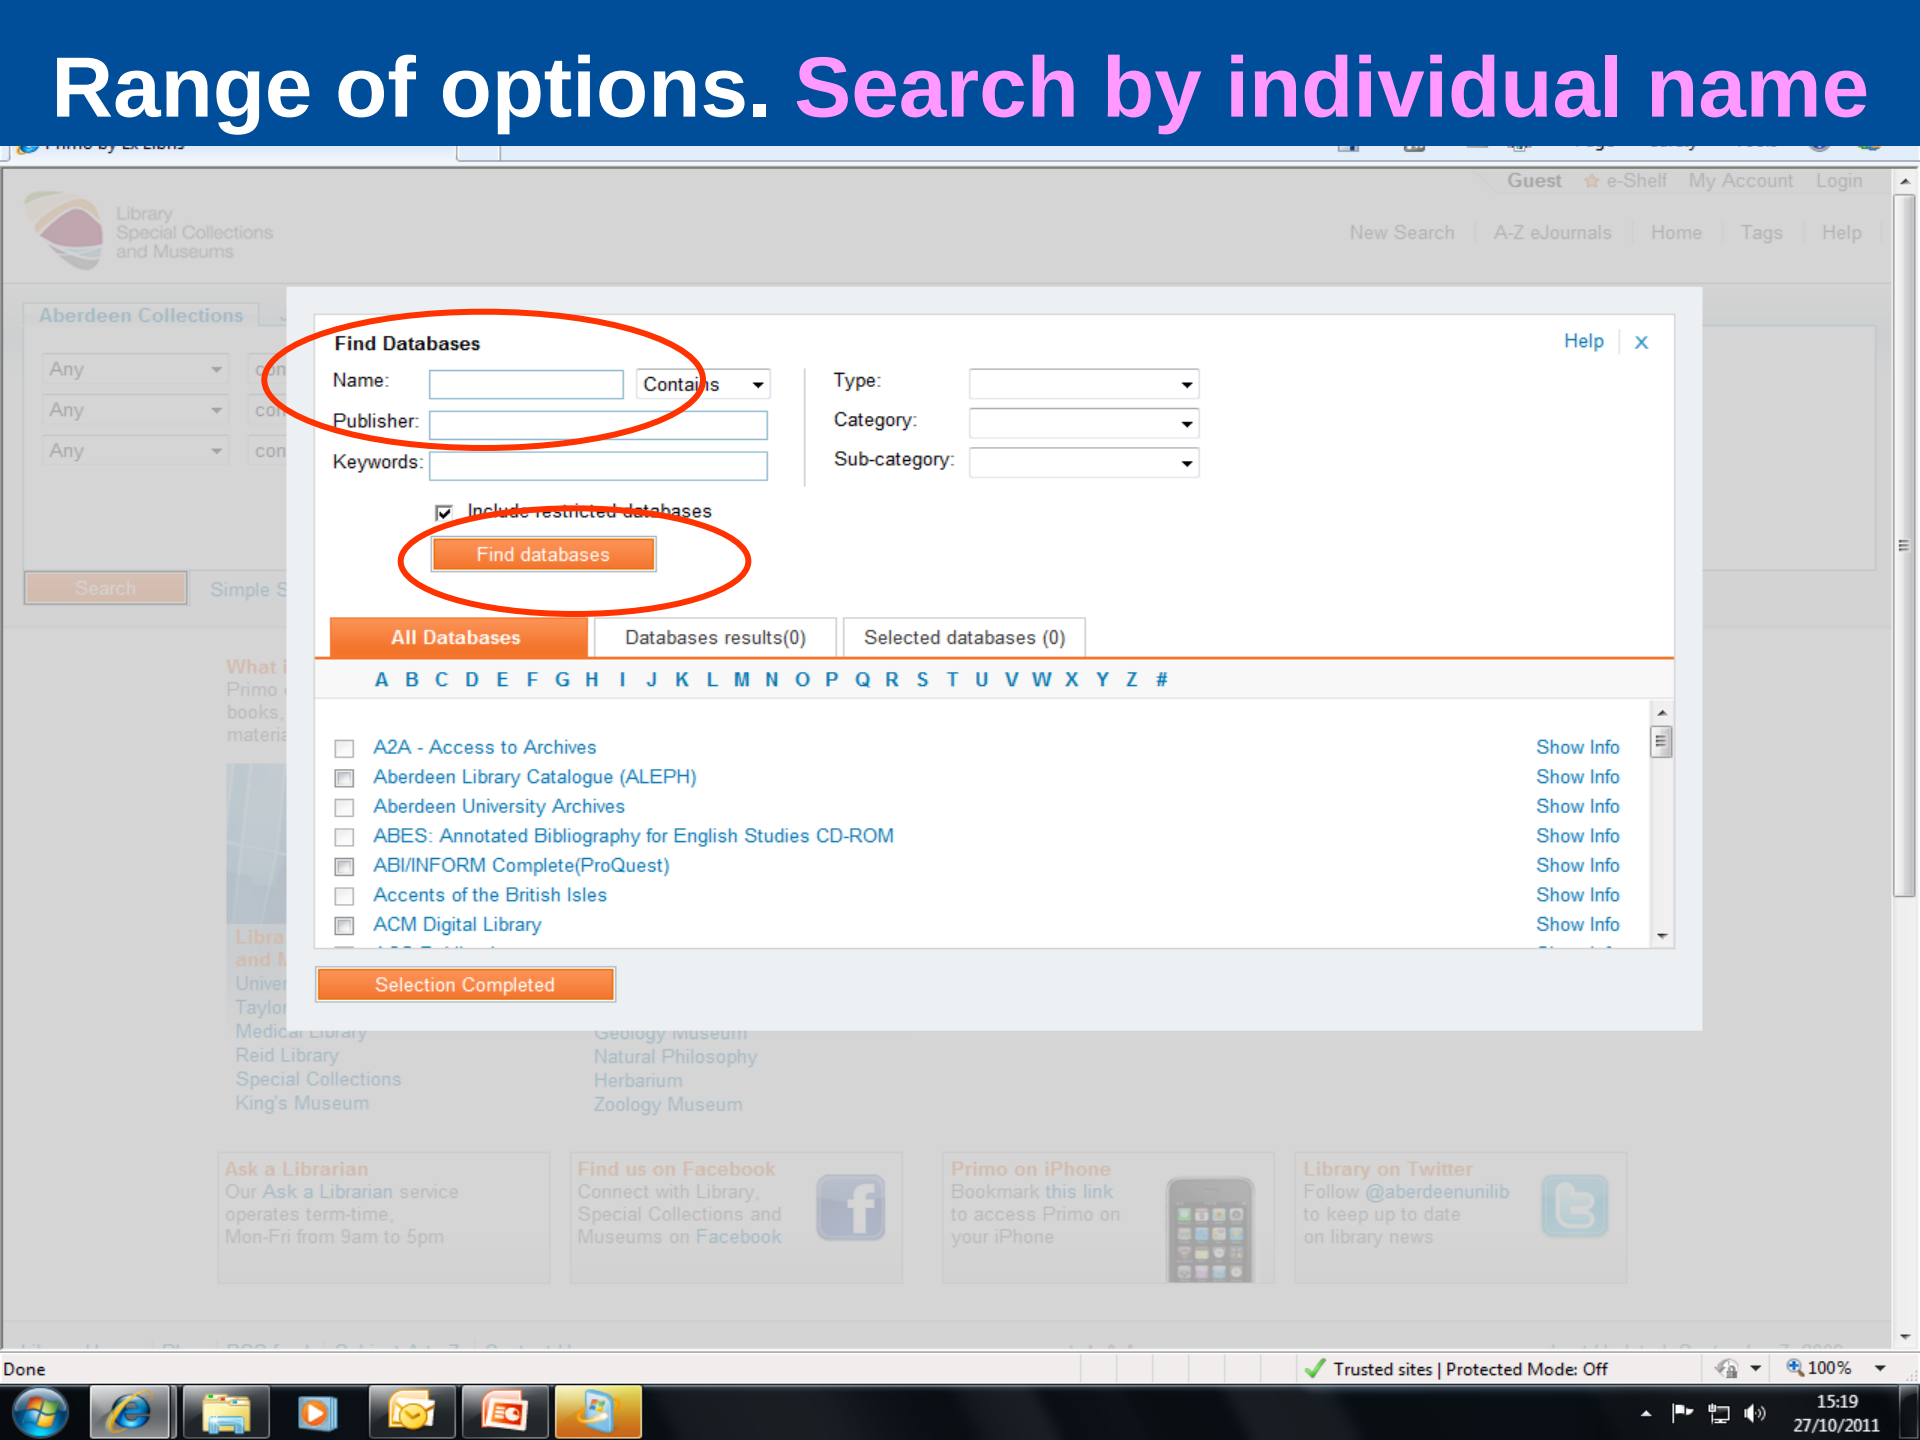
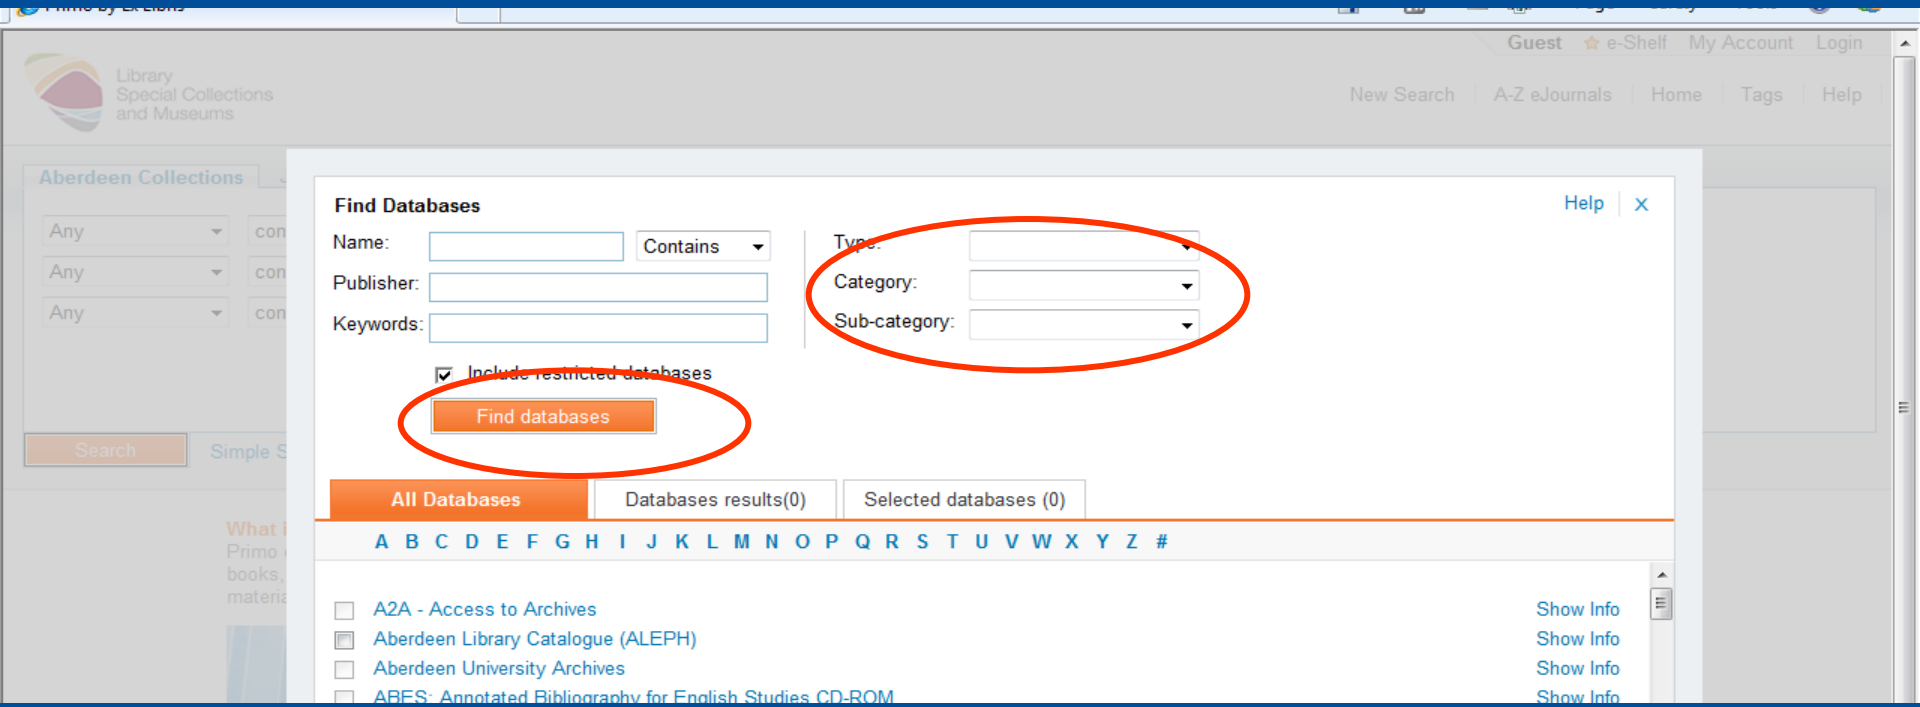
# Range of options. Search by individual name

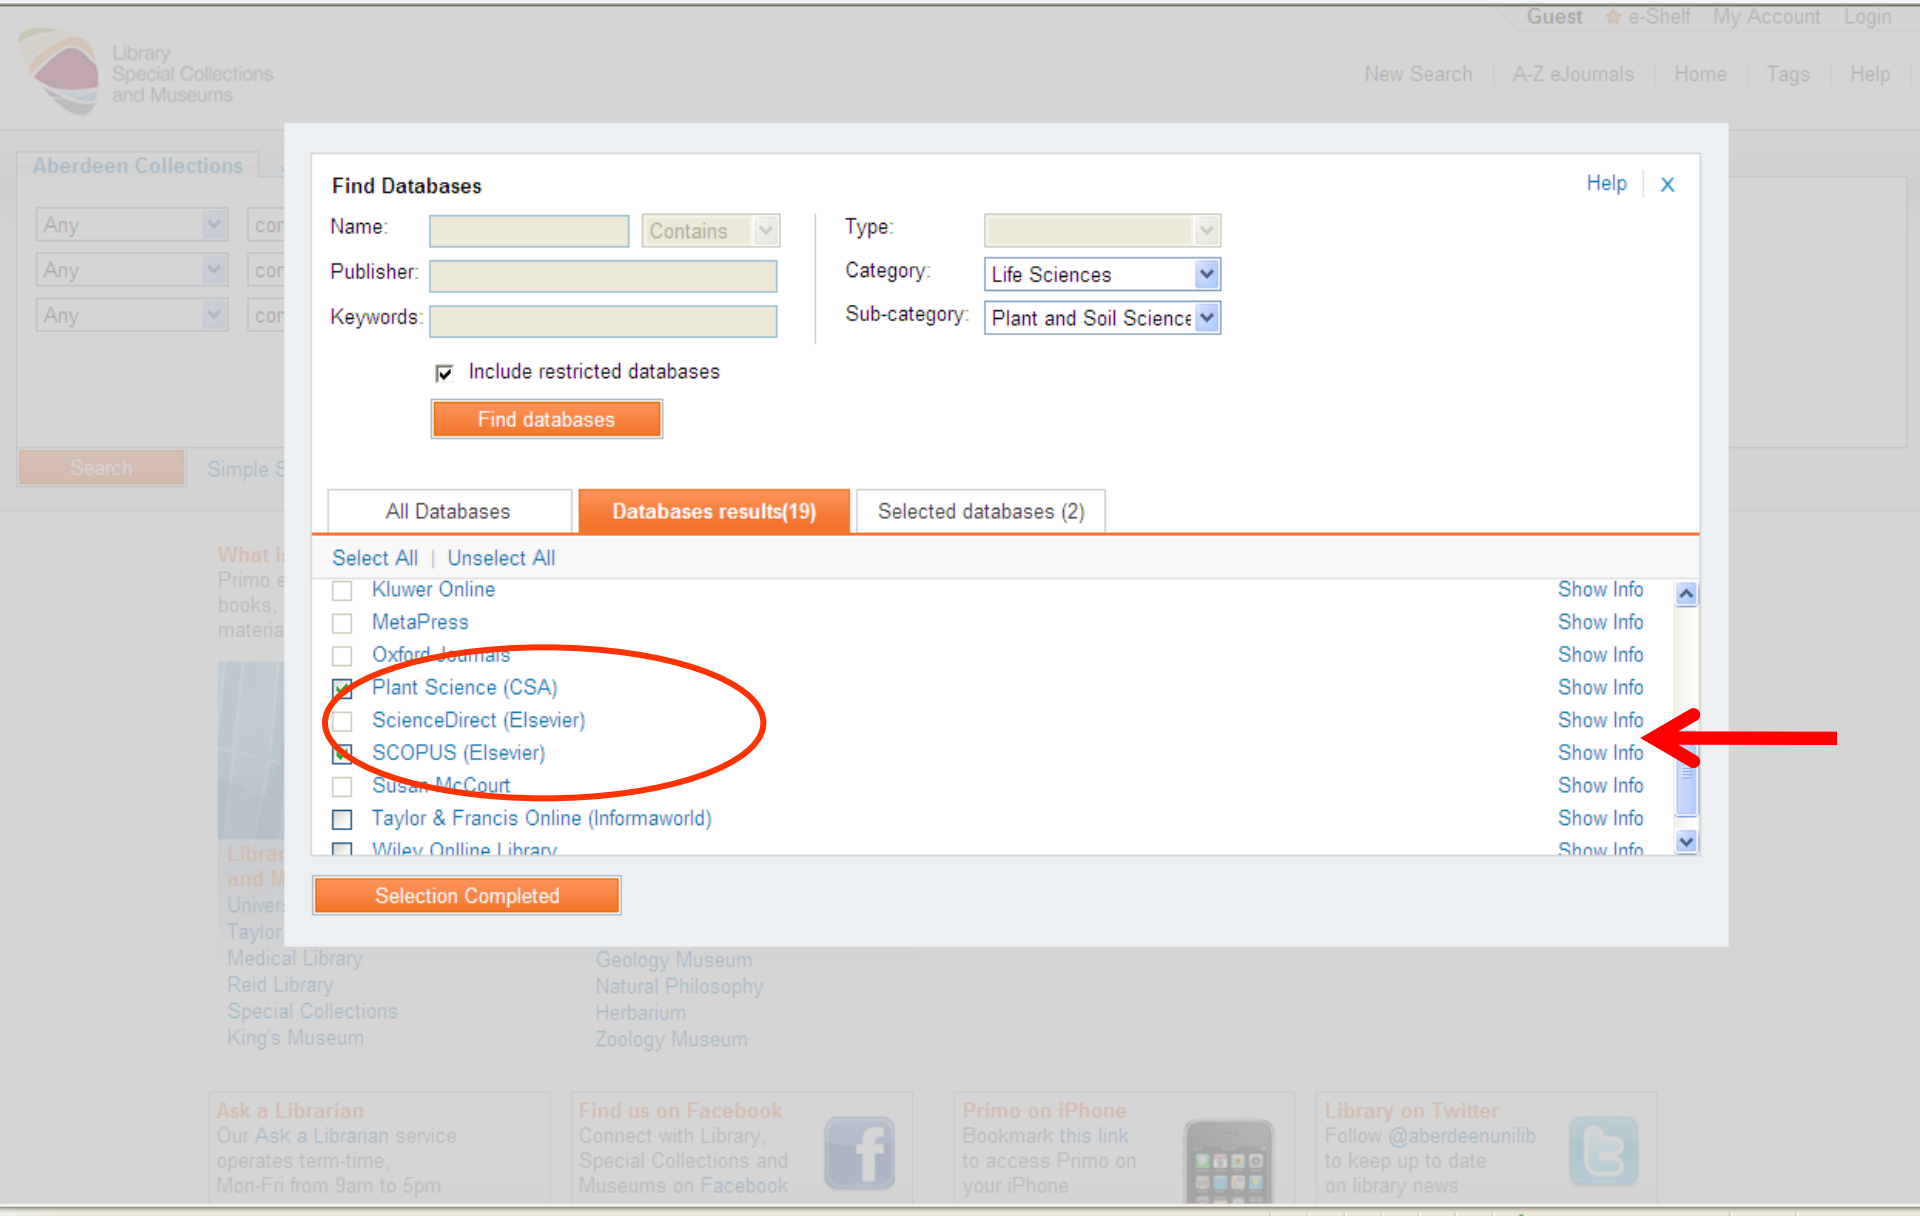


# Range of options. Search by Category (topic)

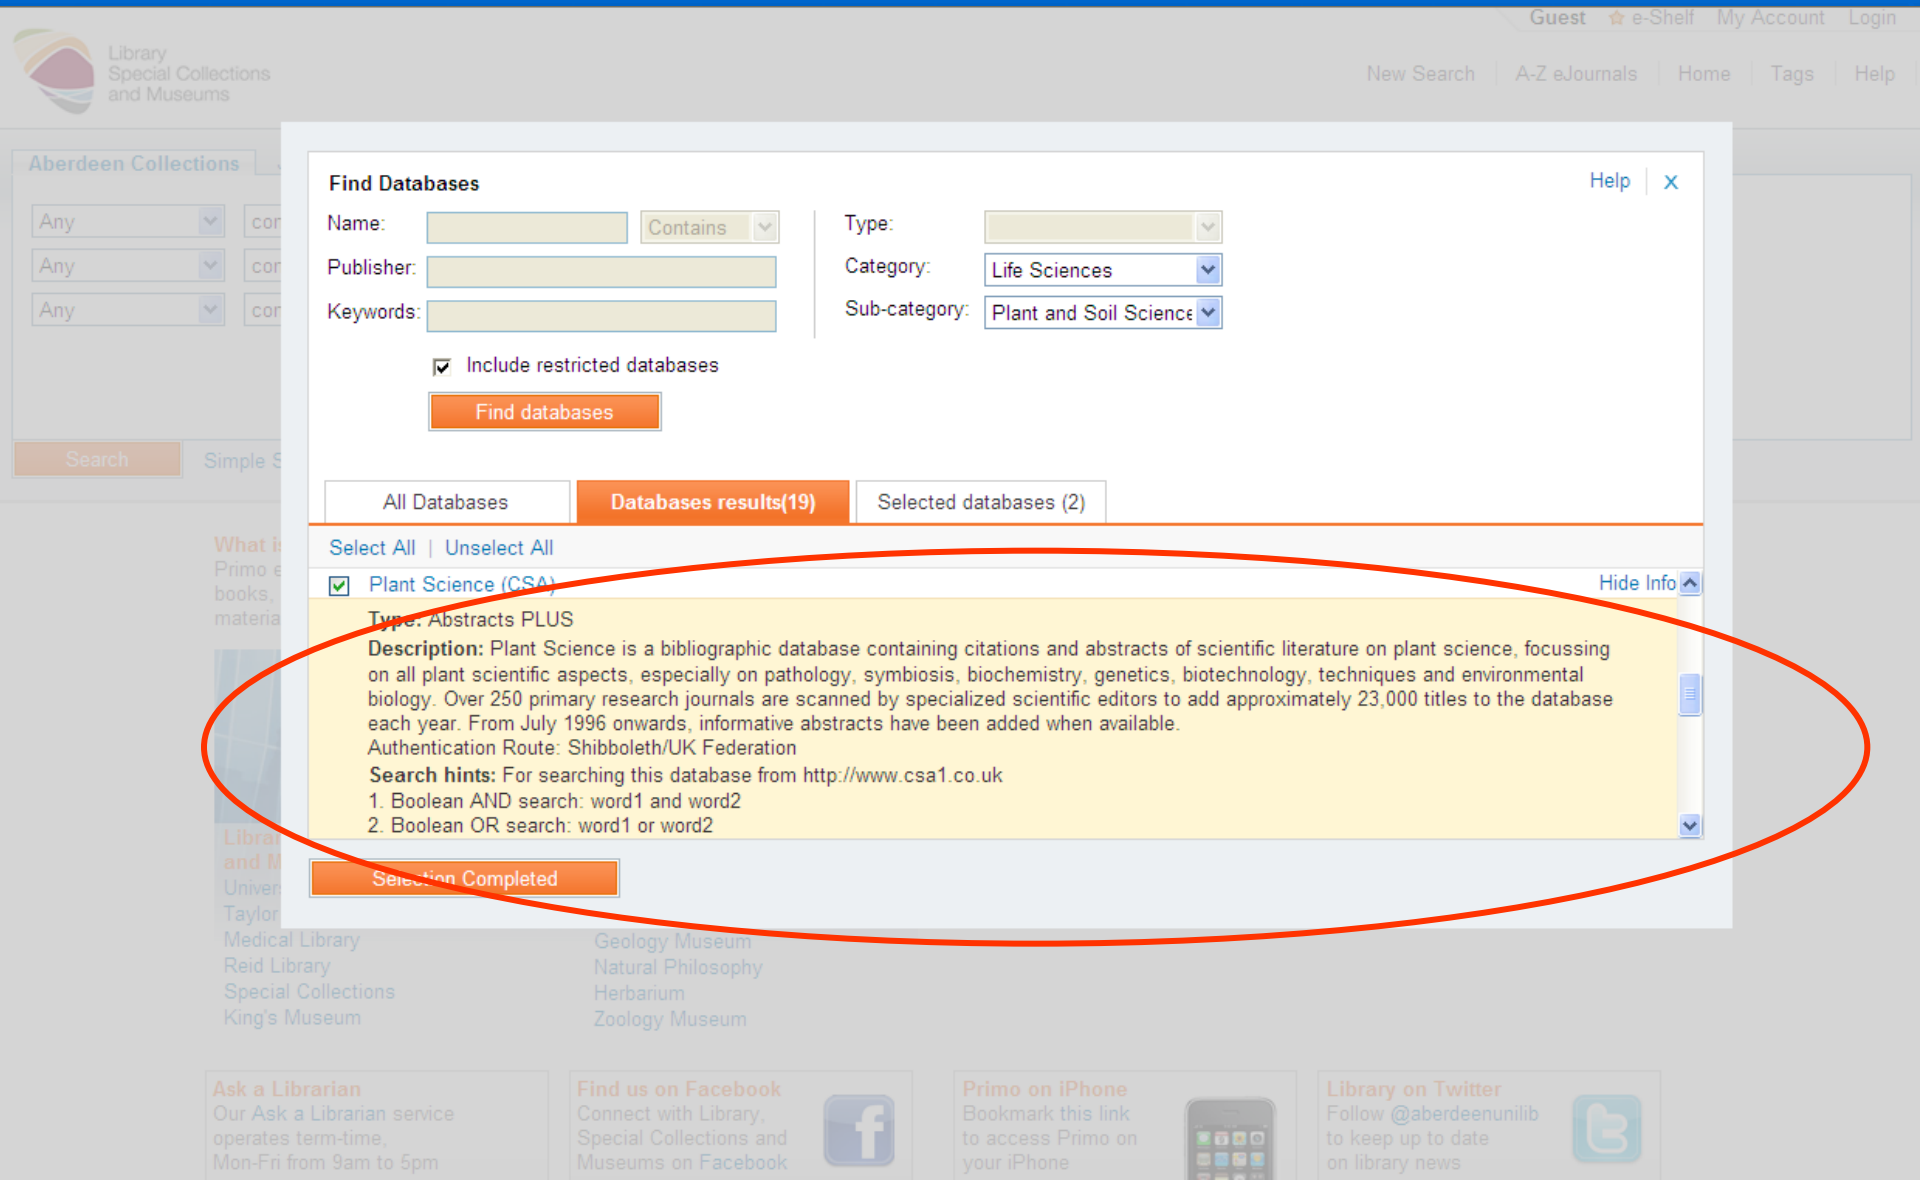


**This is probably the most useful if you are new to the University of Aberdeen**

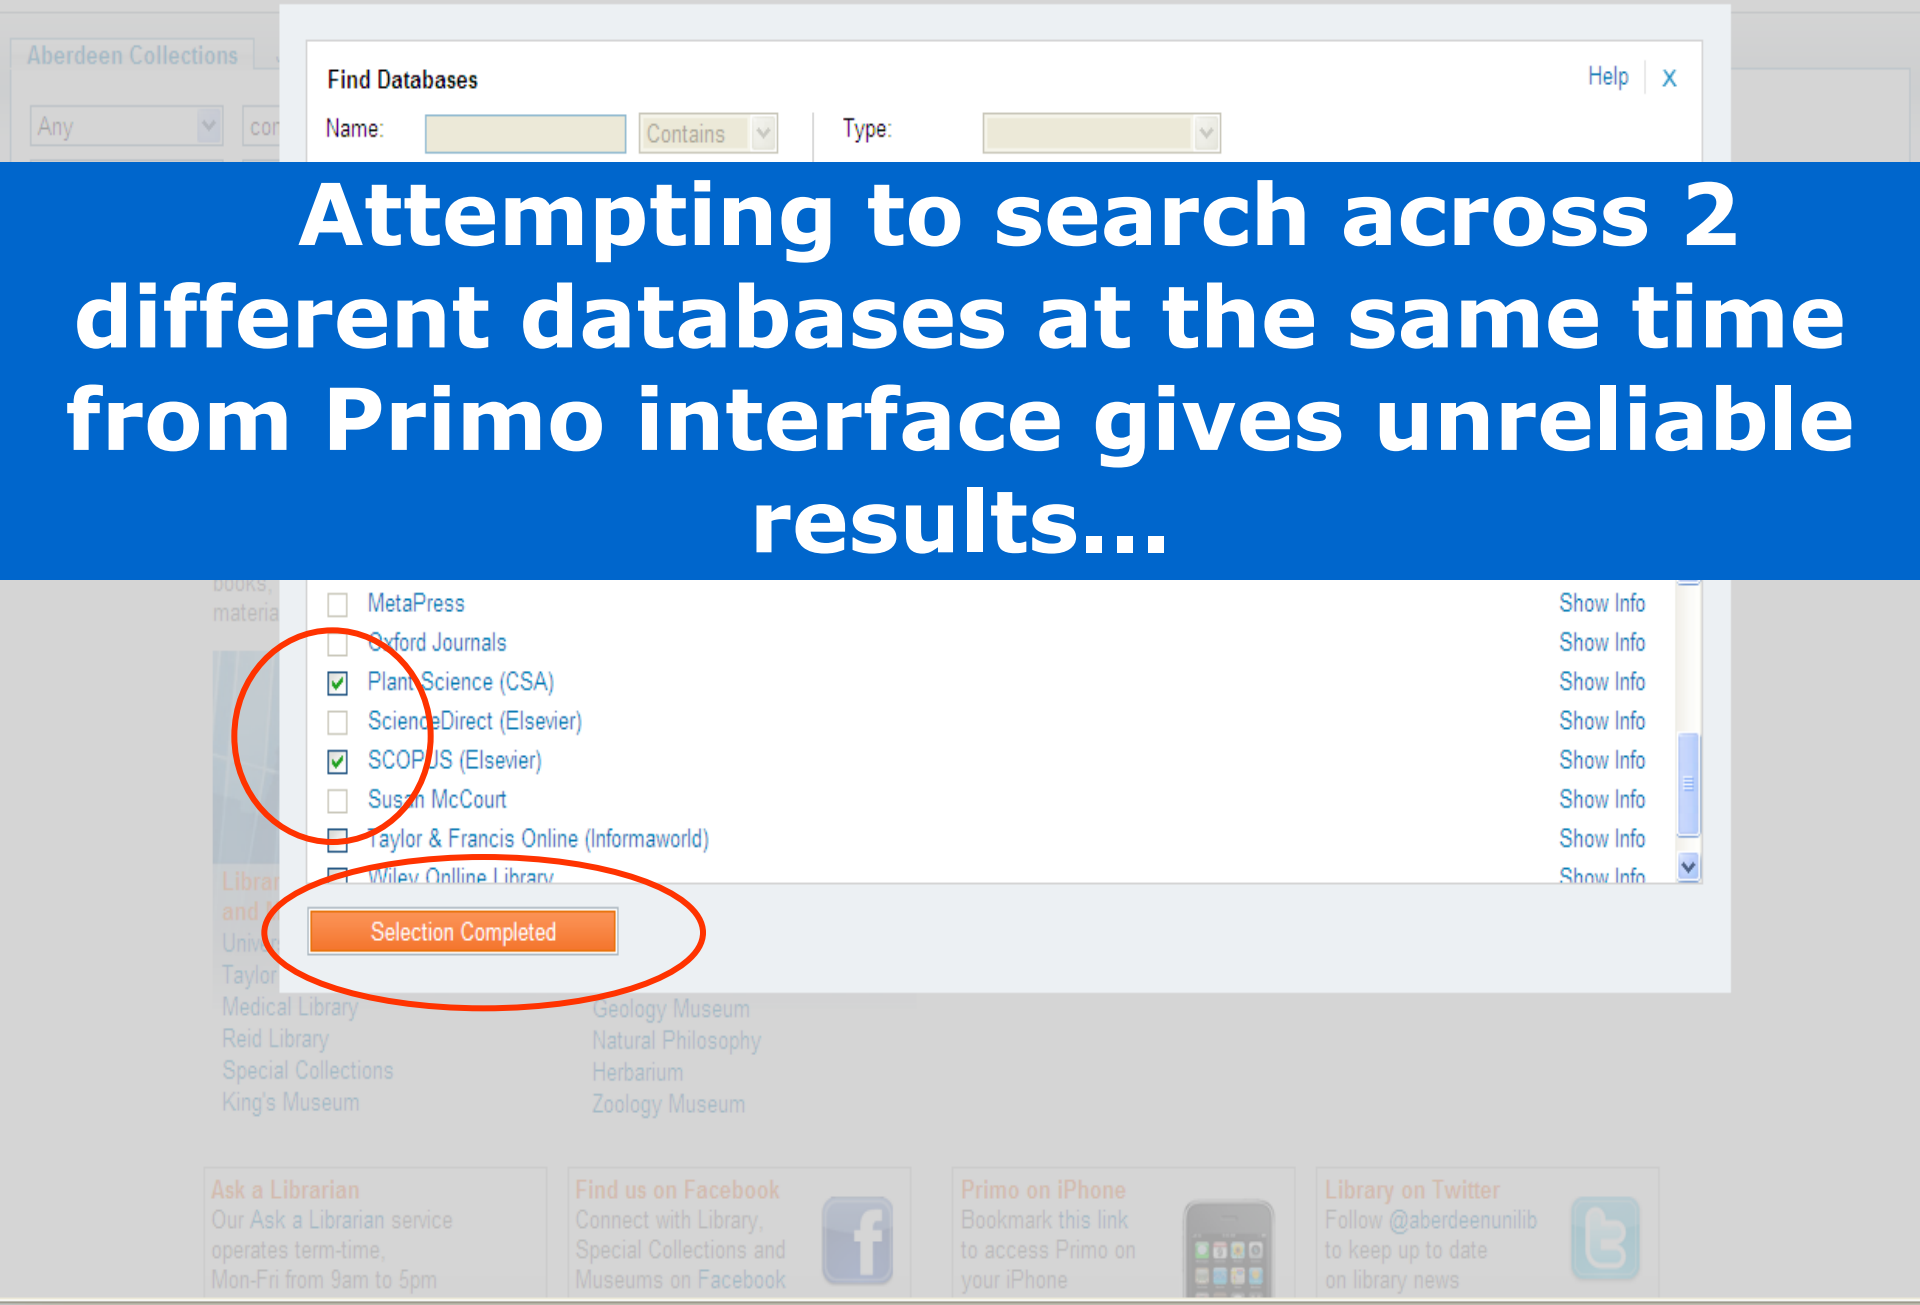
# View more information on databases



# Show info = info on content and guidance on search rules

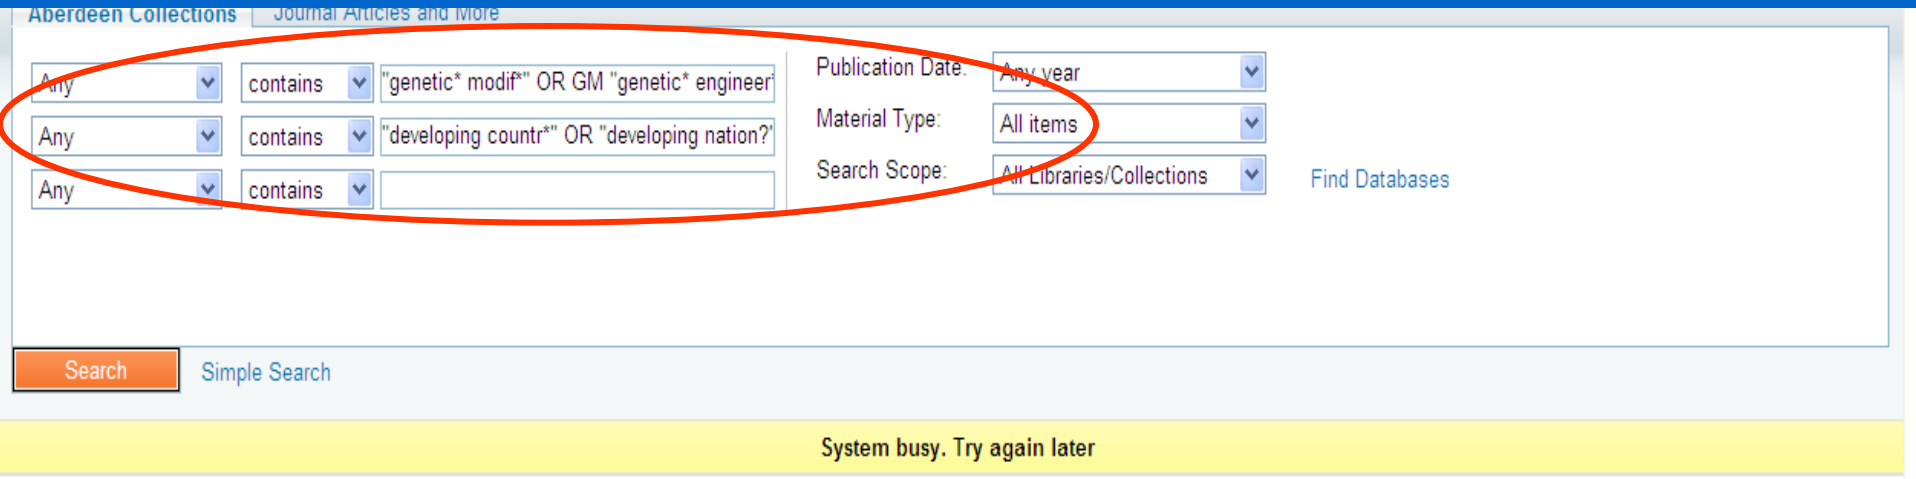


# Don’t be tempted by the tick-boxes



## Attempting to search across 2 different databases at the same time from Primo interface gives unreliable results…

# Using keywords and search rules (for Primo)

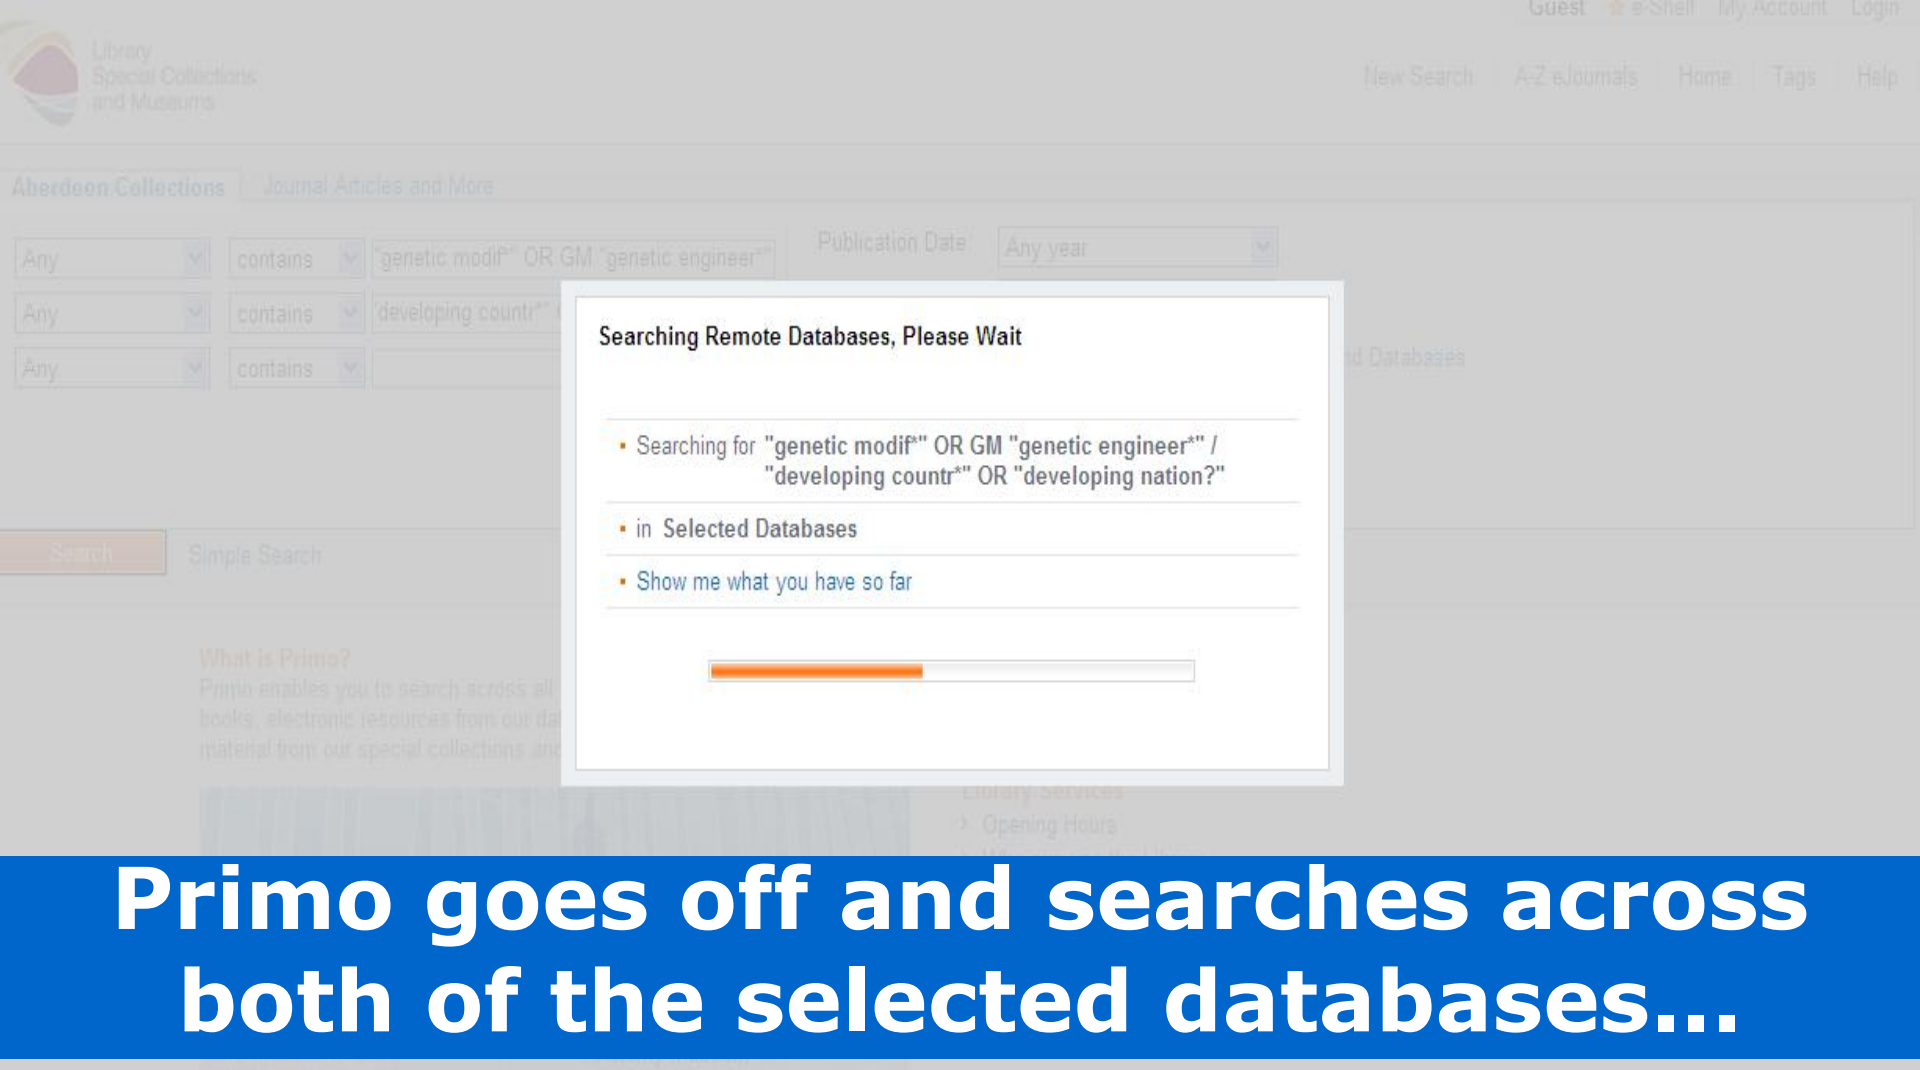


Hypothetical research topic

**Use of genetic engineering in grain crops in developing countries**

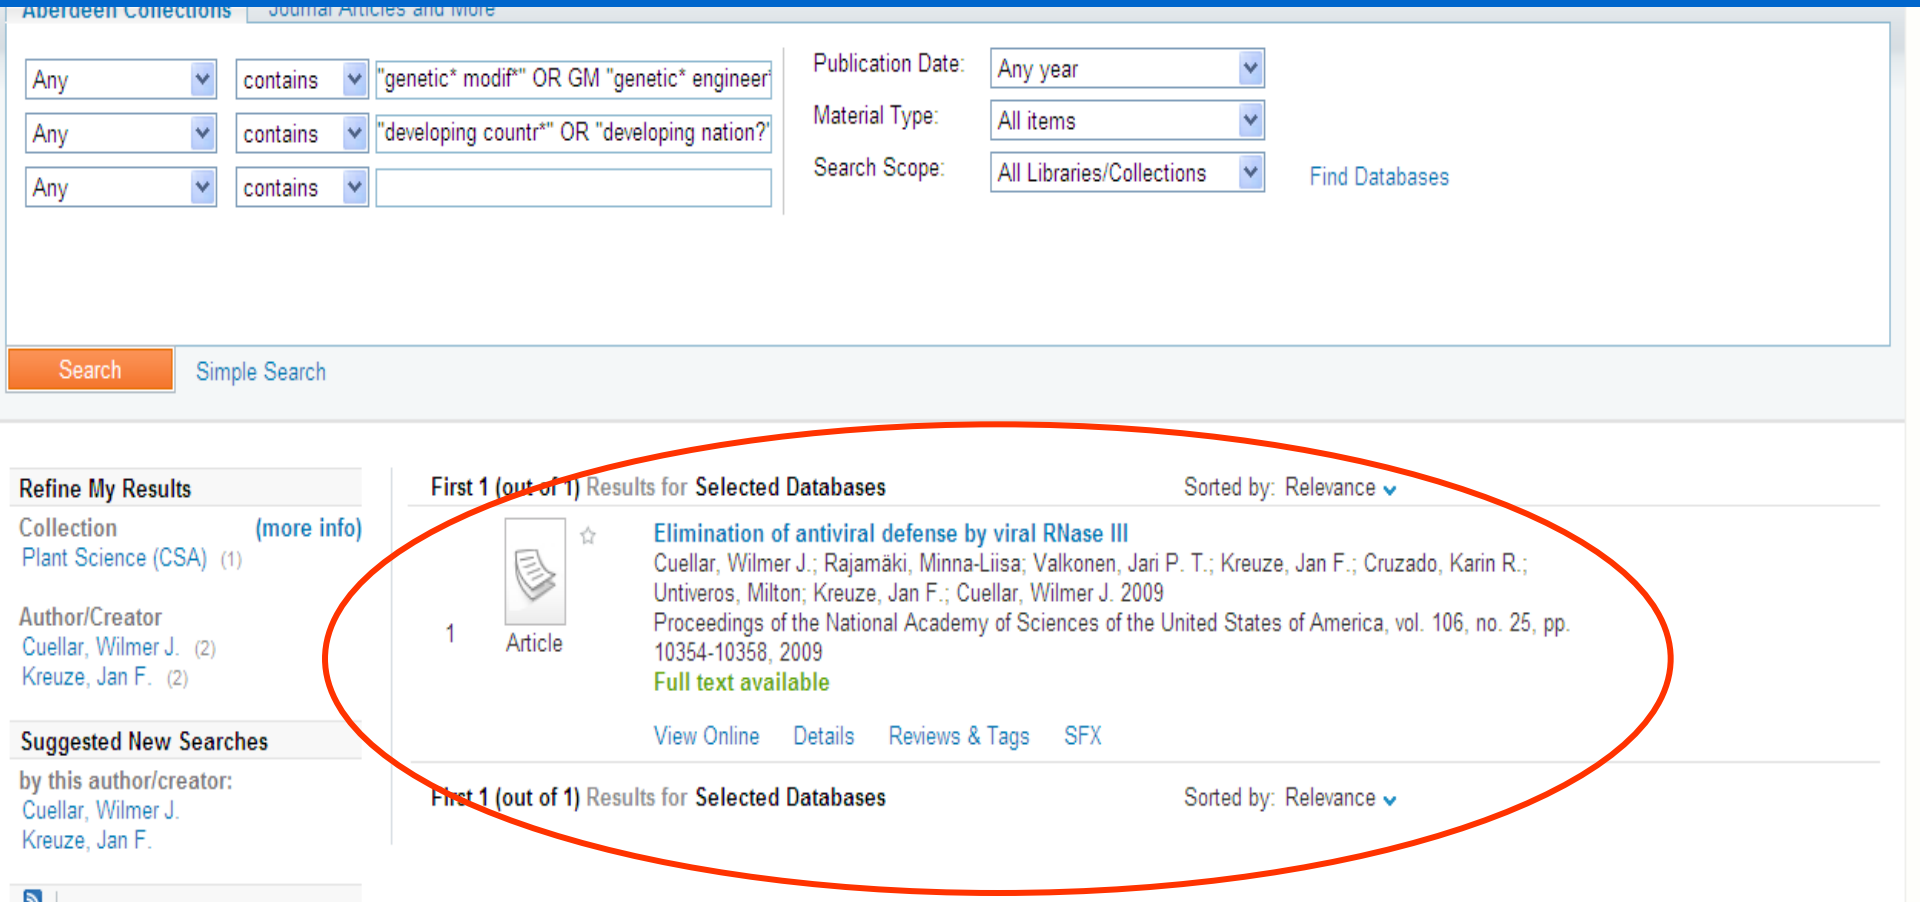
UNIVERSITY OF ABERDEEN

Update my screen automatically



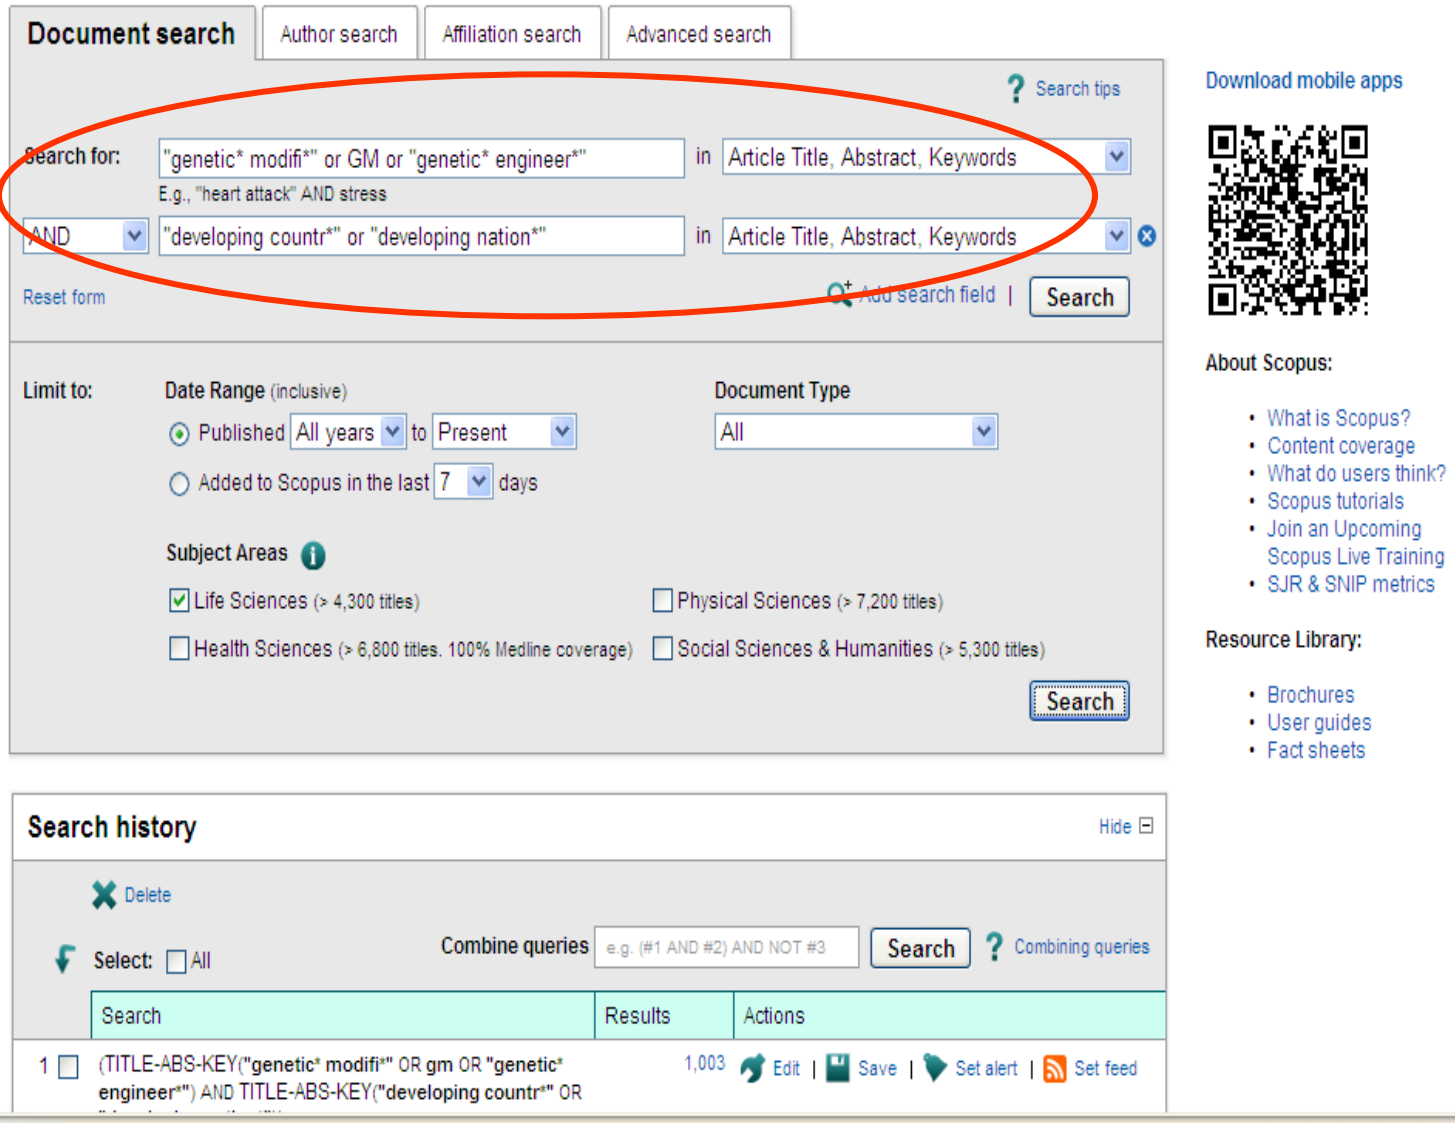
# Primo goes off and searches across both of the selected databases...

# Primo finds 1 record in total. Suspiciously low number!



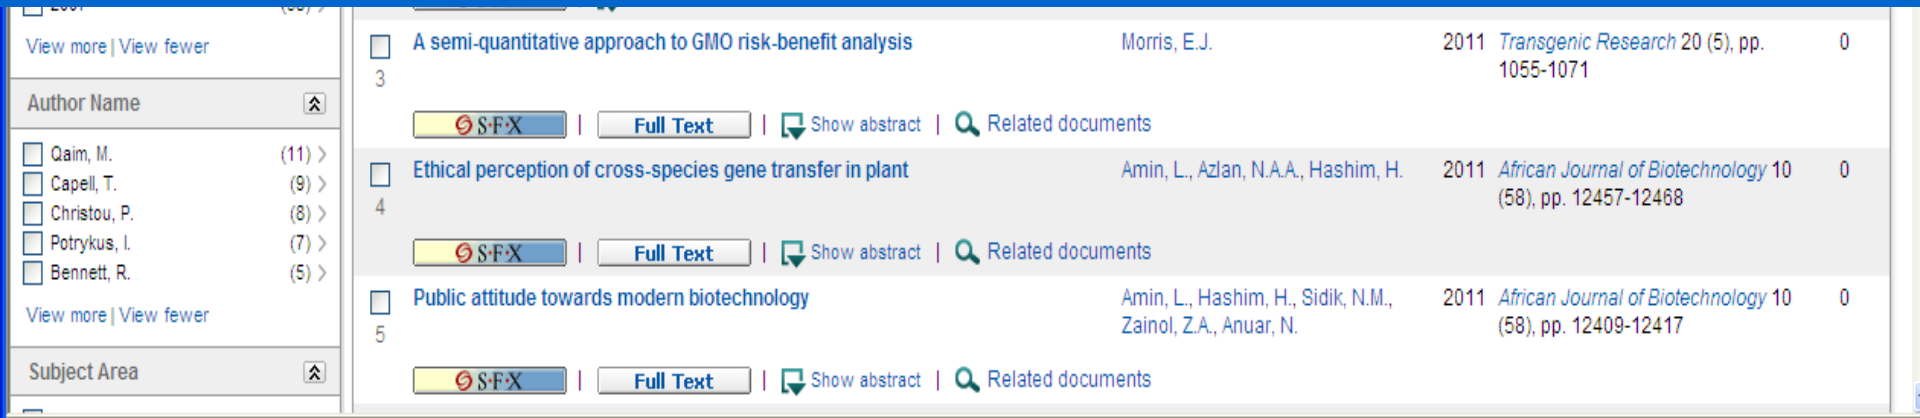
# Don’t rely on this! Search the databases individually. Use Primo to link out to them

# We're in the Scopus database Repeat search (apply correct search rules!)



# Much higher number of references found with exactly the same search (548 compared with 1)…

**Recommendation**: link out and carry out your search on individual databases – more powerful searches available and very different results…



# Sourcing Information: Why use Scopus?

- Large database – good for all topics but is strongest in science, medicine and technology
  - Over 40 million records, some back to 1820s
  - Mainly research papers (journal articles, conference papers) published by academics
- Easy to use
  - Simple search rules
  - Links full text and library catalogue
  - One step export to RefWorks
  - Lots of help available

© Library, Special Collections & Museums, 2012/13

# Scopus Search Rules

- Boolean operators: or / and / not
- Not case sensitive
- Truncation symbol is *
- Exact phrase search is quotation marks e.g. “drug use”
- Can use * within quotation marks e.g. “heart attack*”

© Library, Special Collections & Museums, 2012/13

# Use of drugs by adolescents participating in sport

## Steroid Use: Adolescents

# Association Between Narcotic Use and Anabolic–Androgenic Steroid Use Among American Adolescents

BRYAN E. DENHAM

Department of Communication Studies, Clemson University, Clemson, South Carolina, USA

*Drawing on the data gathered in the 2006 Monitoring the Future study of American youth, the present research examines associations between use of narcotics and use of anabolic–androgenic steroids (AASs) among high-school seniors (n = 2,489). With independent measures and controls including sex, race, media exposure, socializing with friends, participation in recreational and school-sponsored sports, perceptions of drug use among professional athletes, and perceptions of steroid use among close friends, binary logistic regression analyses revealed significant associations between AAS use and the use of alcohol, crack cocaine, Vicodin, gamma-hydroxybutyrate (GHB), Ketamine, and Rohypnol. While use of both AASs and the narcotic drugs generally did not eclipse 5% of the sample, the numbers extend to many thousands in larger populations. Implications for health practitioners and recommendations for future research are offered. The study's limitations are noted.*

**Keywords** adolescents; alcohol; anabolic–androgenic steroids; club drugs; Monitoring the Future; narcotics; sports participation

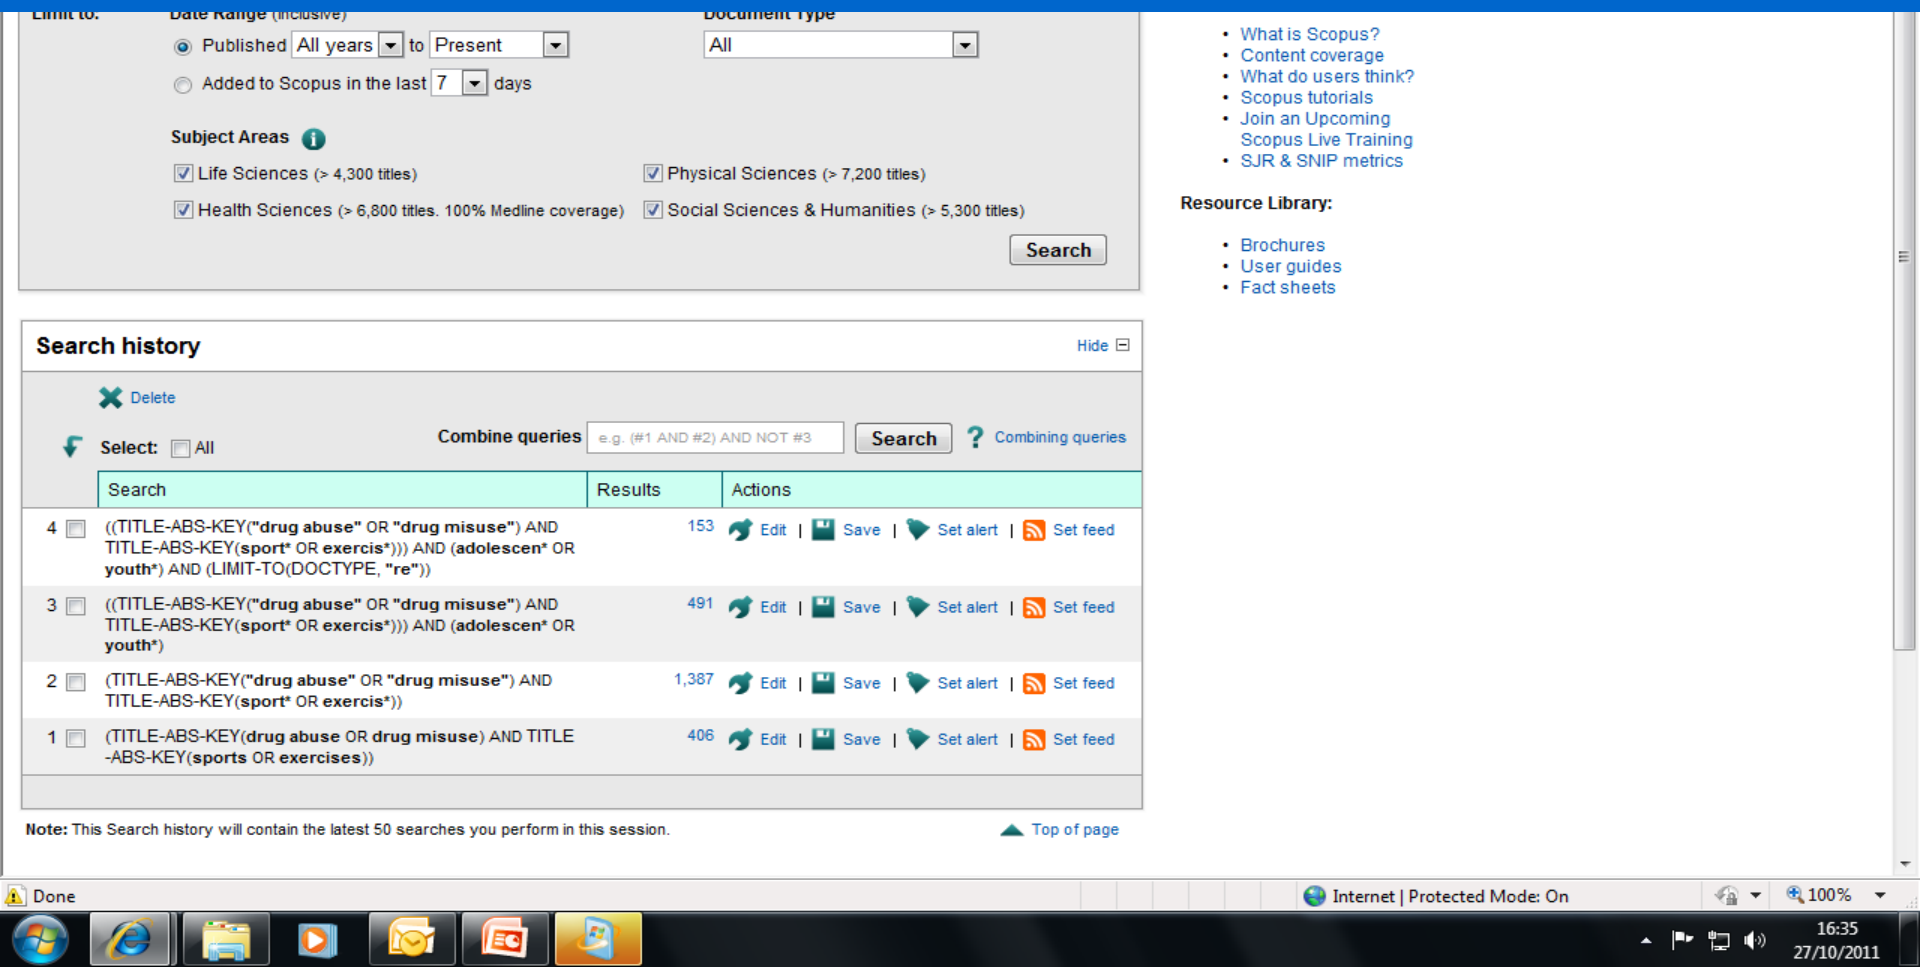
27/10/2011

# Modifying your search: if results are not what you want, look at how you got there (Search history) and then start a new/different/better search ...



# From Search History can Save a search or Set Alert or set up a RSS feed. Get results pushed to you rather than having to go look for them. (Important note : Oct/Nov 2012 – personalisation feature not working)

# Scopus - features …

- Refining/limiting options: add extra keywords or different keywords
- Limit results by specific categories: journal titles; authors; years; type of document (very useful – especially if there are Review items)
- Use found references to "pearl grow" others
- Jump backwards and forwards in time from one useful record
- Build up search in steps using "sets" of results
- Export to RefWorks
- Set up a personal account
- Save searches and set up Alerts
- Analytical tools
- Book onto a Scopus workshop for more detail

© Library, Special Collections & Museums, 2012/13

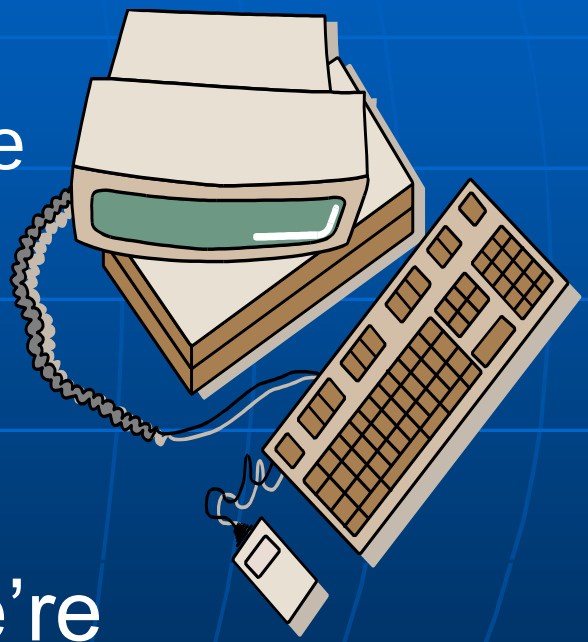
# Important databases

- **Scopus** and **Web of Science/Knowledge** are the biggest and broadest databases available
- **Medline** is the largest medical database (also available as PubMed – but don't use it as PubMed!)
- **OnePetro** and **IEEE Xplore** are important oil and technology related databases
- **ABI Inform** and **Econlit** are specialist business, management and economics databases
- **ATLA** is the biggest religion database
- **LION** database useful for topics related to English
- **LexisLibrary** and **Westlaw** are core databases in law
- **JSTOR** extremely useful for older material – most subject areas
- **Primo** lists all of our databases

© Library, Special Collections & Museums, 2012/13

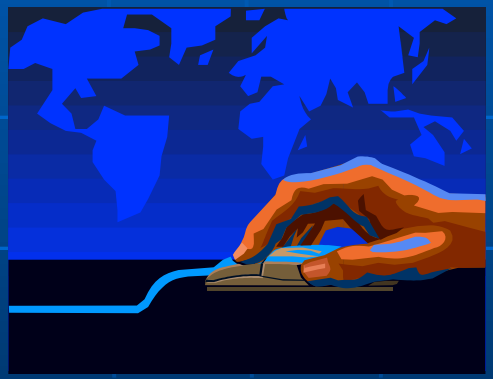
# Now …

- Try things out for yourself
  - See instruction sheet
  - Please use worksheet to guide you
    - Primo - to find databases
    - Scopus – use one of the largest/broadest available to us
- Ask for help – that's what we're here for



© Library, Special Collections & Museums, 2012/13

# Successful searching: using the Web …

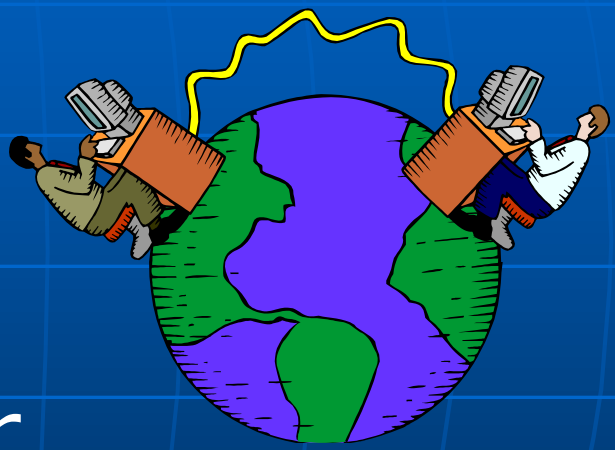


Janet MacKay

©Library & Historic Collections, 2012/13

# Sourcing Information: The Web
## Tools to find information

- Search Engines
- Subject Gateways
- Blogs & Wikis
- Social Networking – Nature network, Twitter



The tools you choose depend on your requirements

© Library, Special Collections & Museums, 2012/13

# Search Engines

- Good for: finding types of documents not covered in academic databases e.g. government documents, reports, operational information, manuals
- You need to evaluate the results

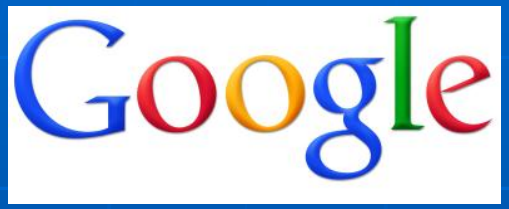
© Library, Special Collections & Museums, 2012/13

# Sourcing Information: Web Search Engines

- **Google** popular - **www.google.com**
  - Indexes billions pages; ranks results
  - Good reputation for relevancy and **wide subject coverage** + **search for images**
  - **Advanced Search** features (but hidden!)
  - Always be careful what you use for academic work – **evaluation essential**
  - Good for identifying document types not included in databases e.g. reports, commercial and operational documents
- Mainly for Year 1 undergrads **- Google Scholar** - http://scholar.google.com/

© Library, Special Collections & Museums, 2012/13

# Search Rules for Google & Google Scholar



- Automatically links keywords (ideas) with Boolean Operator - AND
- Link alternative meanings with Boolean Operator – OR
- Automatic stemming (truncation)
  e.g. *diet* finds *diet* and *diets* and *dietary*
- Uses "phrase searching"
- The order of your search words has an impact on results
- Use singular form of the word for broadest results

© Library, Special Collections & Museums, 2012/13

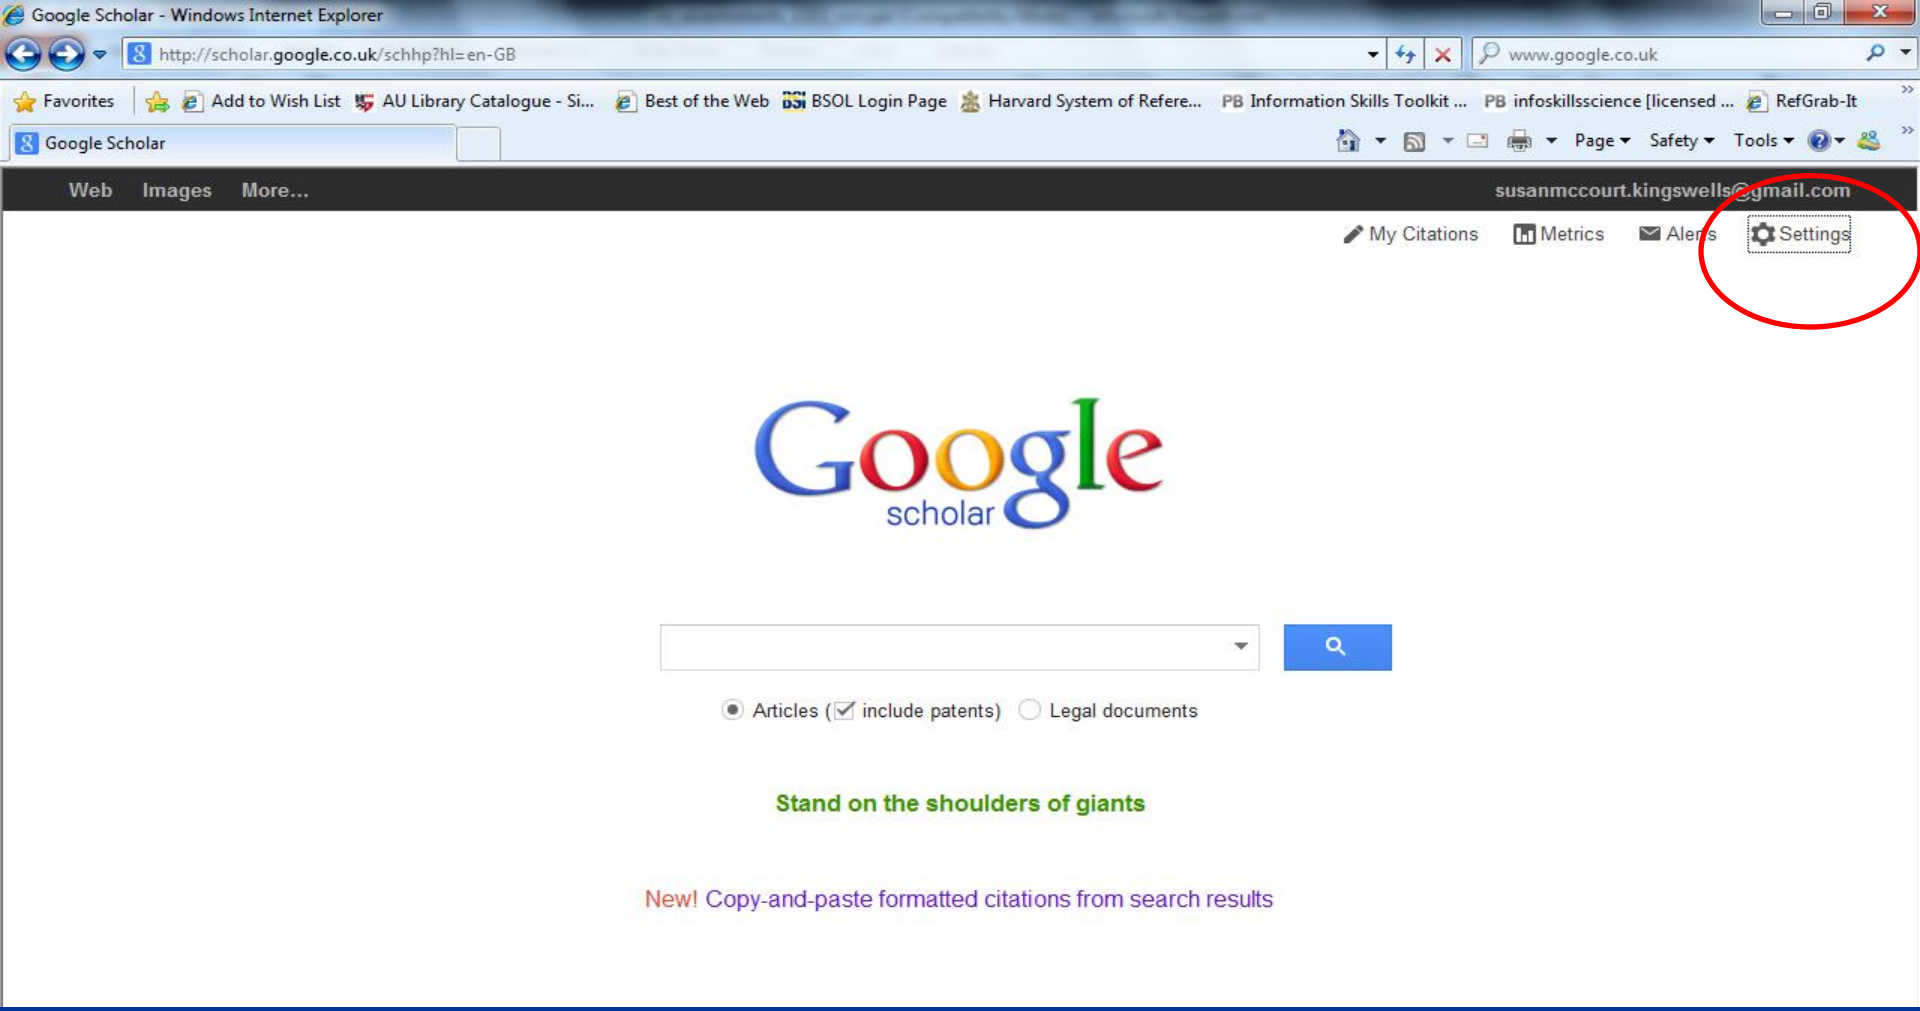
# Sourcing Information: Google Scholar

- Not a substitute for academic databases
- Searches scholarly literature
- Peer-reviewed papers, theses, books, preprints, abstracts, technical reports
- From academic publishers, professional societies, institutional repositories, universities
- Useful support – may contain papers published outside the date range of the databases you used
- Can create email alert
- Less powerful sort/organise/evaluate functions than in academic databases

© Library, Special Collections & Museums, 2012/13



# Google Scholar

**Click Settings (then Library Links) to allow export to RefWorks, search for pages in another language, use SFX linking service**

# PINAKES
## A Subject Launchpad

About

*Featured in the BBC Web Wise guide to the Internet, and many other online and print publications.*

***Hosted by Heriot-Watt University, Edinburgh, Scotland.***

ADS (Archeology Data Service): archeology

AERADE: aerospace and defence studies

Biz/ed: business and economics

BUBL: library and information science

Careers Guide: Free career advice and job vacancies

ChemDex: chemistry

Education & Training UK: schools, courses and information

ELDIS: development & the environment

# Subject Gateway Platform - PINAKES

**http://www.hw.ac.uk/libWWW/irn/pinakes/pinakes.html**

# Other Search Tools – Blogs & Wikis

## Blog (web log)

- a hybrid of web page, diary and links digest
- contain short/informal entries with links to other relevant sites
- Example: EduResources Web Log
- Google Blog Search from More drop down menu or at www.google.co.uk/blogsearch?hl=en

## Wikis (WikiWikiWeb) e.g.Wikipedia

- Publicly editable web pages
- Can add content or edit existing pages

© Library, Special Collections & Museums, 2012/13

# Other Search Tools

## Social Academic Networks

- Stay in touch with other academics sharing the same research interests
- Nature Network (Nature); Mendeley

## Twitter (social networking tool)

- aberdeenunilib = Library account
- Go to http://twitter.com/aberdeenunilib
- Used to advertise library workshops; new resources, ezine etc.

© Library, Special Collections & Museums, 2012/13

# Web Resources - evaluation checklist

- **Accuracy** – Spelling errors? Content - editorial control?
- **Authority** – Check credentials; domain
- **Objectivity** – Aim? Bias? Sponsored?
- **Currency** – Up-to-date?
  Undated = no authority
- **Coverage** – topics (in-depth or summary)
  Supported by evidence? Research?
  References?
- Subscribe to a **code of practice**?
- **Source** – evaluated e.g. subject gateway
- **Contact information**?
- **Links** to reputable websites?

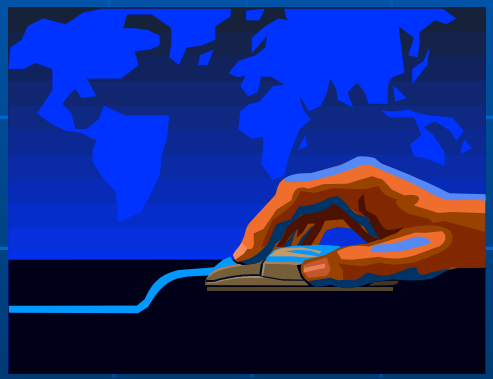
© Library, Special Collections & Museums, 2012/13

# Now …

- Try things out for yourself
  - See instruction sheet
- Ask for help – that's what we're here for

© Library, Special Collections & Museums, 2012/13

# Your responsibilities: copyright, technical, plagiarism…



Susan McCourt

©Library & Historic Collections, 2007/08

# Copyright

- All copying you do must comply with copyright law.
- Most printed and electronic documents are protected by copyright legislation.
- See Library Guide QG GEN008 Photocopying and Copyright - your Responsibilities.
- Electronic media are subject to the same laws of copyright as paper media.
- It is illegal to make an electronic copy (e.g. by scanning, downloading, copying from disk, etc.) without authorisation; please read the guidelines on e-Copyright.

© Library, Special Collections & Museums, 2012/13

# Off Campus Access: Technical Issues

- When on campus you are on a network that is recognised by our suppliers. Additional software (utilities/plugins) often already installed so that software works.
  BUT install the ebrary reader on your office PC.
- When off campus you will have to:
  - enter proxy settings
  - allow pop-ups for certain sites, e.g. ebrary, RefWorks
  - install extra plugins e.g. ebrary reader, Write-N-Cite
- See relevant library guides and computing fact sheets for proxy and vpn information
- Check www.abdn.ac.uk/proxy/

© Library, Special Collections & Museums, 2012/13

# The “P” Word

PLAGIARISM

Plagiarism = Fraud = Cheating

© Library, Special Collections & Museums, 2012/13

# Plagiarism

- Aberdeen University - Code of practice on student discipline
- Aberdeen University – various web pages available on the topic of plagiarism via www.abdn.ac.uk/sls/plagiarism and www.abdn.ac.uk/writing/
- Indiana University site - useful background *Plagiarism: What it is and how to recognise and avoid it* at www.indiana.edu/~wts/pamphlets/plagiarism.shtml

© Library, Special Collections & Museums, 2012/13

# Avoiding plagiarism: techniques

- Note-taking
  - in lectures/seminars
  - when reading
- Use recommended style to
  - cite in the text of your paper/thesis
  - present a detailed list of references/citations at end (bibliography)

Final product – your own words and style with acknowledgement to previous work

© Library, Special Collections & Museums, 2012/13

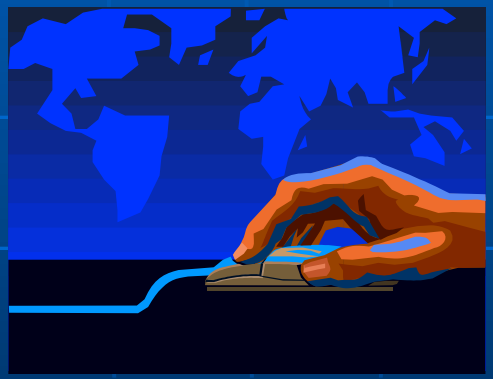
# A citation answers questions

- **Who?**
  - Who wrote it? Authors or organisations if no personal authors. Publisher details if a book
- **What?**
  - What is the title of the book or journal article or conference paper etc? If a journal article or conference paper - What is the title of the journal or conference proceedings?
- **When?**
  - When was it published? For web pages - year of publication/creation. And the date you accessed the page
- **Where?**
  - Where can I find it? For articles this includes volume, issue and page numbers as relevant, For books include place of publications

**Styles/formats just differ in how much of the information to present, the order in which it is presented and the punctuation used between the different "answers"**

© Library, Special Collections & Museums, 2017/18

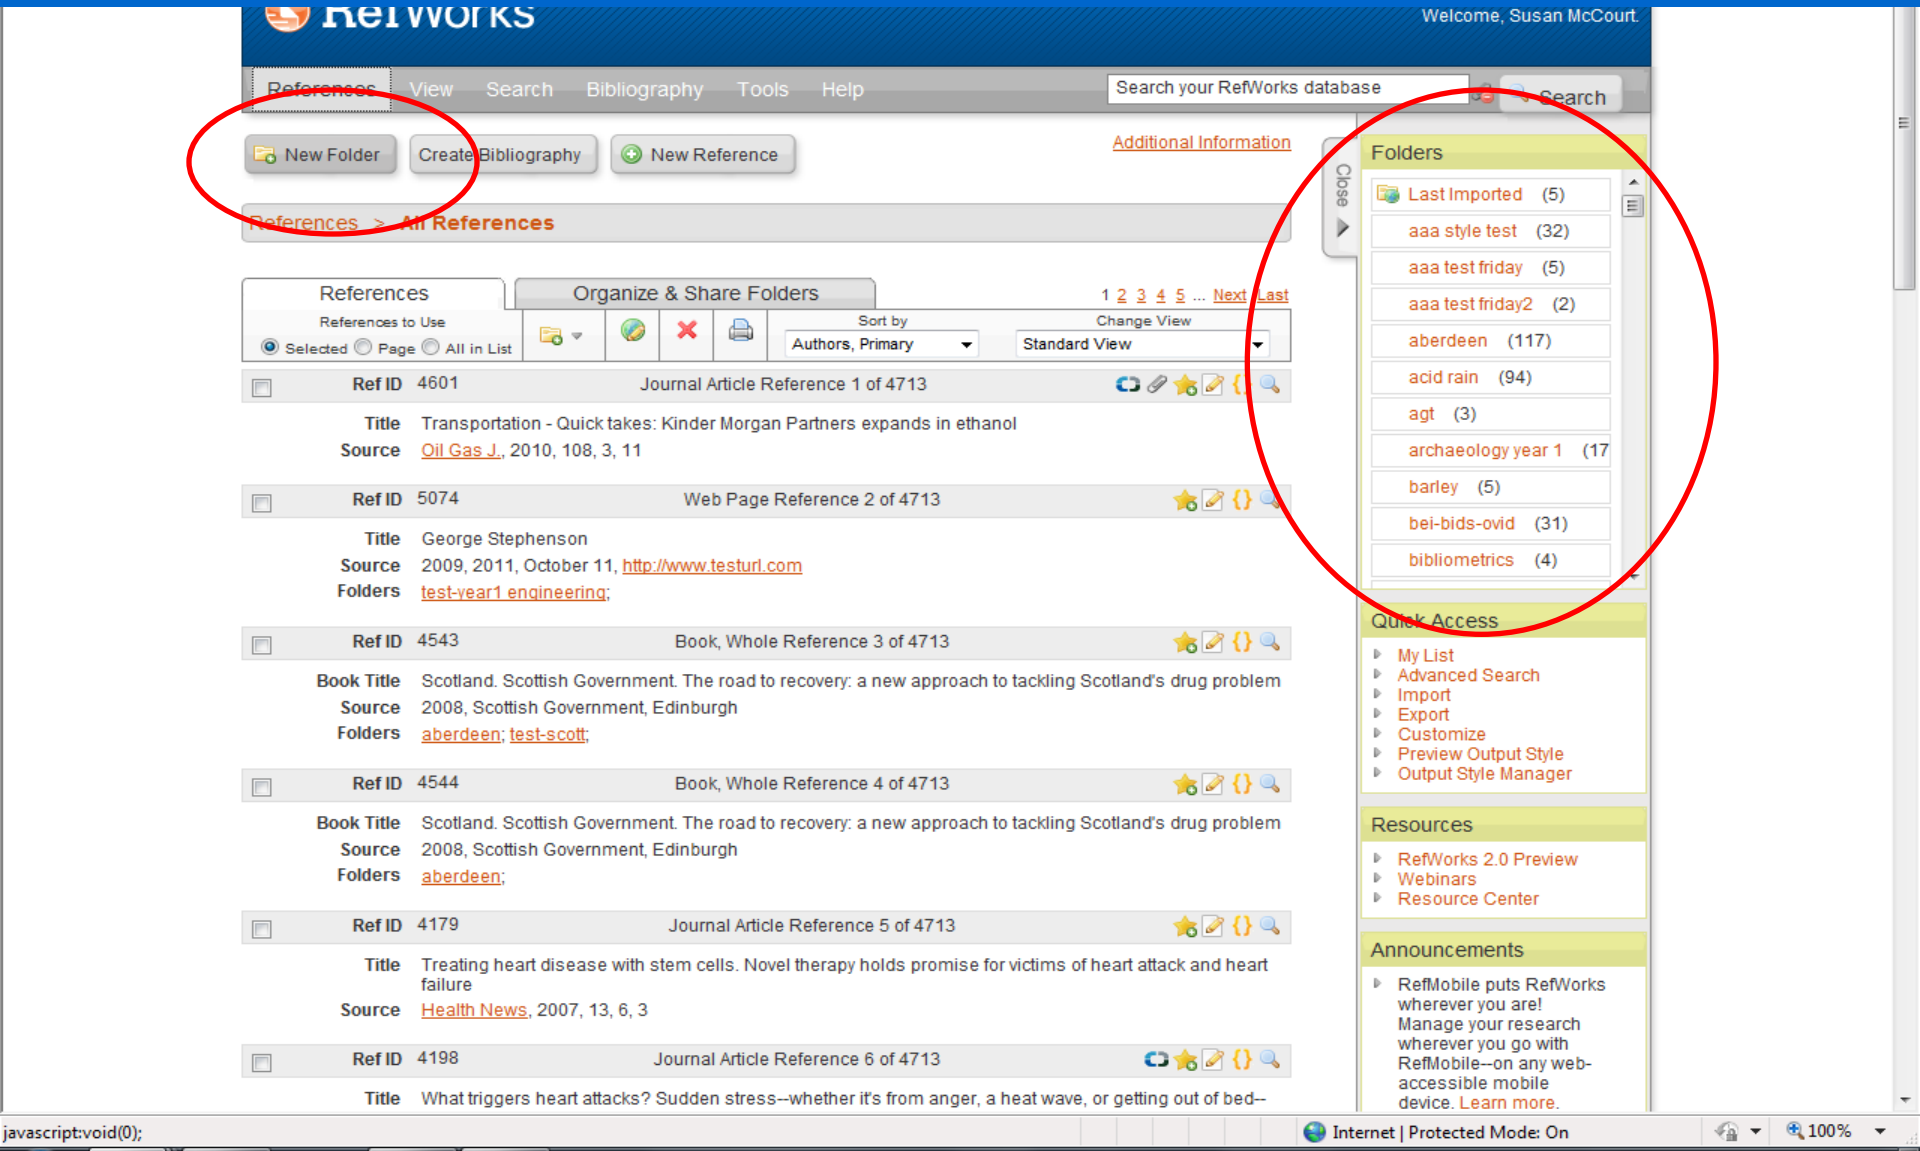
# Managing your results: RefWorks (a teeny bit more!)…



Susan McCourt

©Library & Historic Collections, 2007/08

# Record Management – create folders to manage your records more efficiently



# What else can RefWorks do?

## Much more than a store!

- Use Write–N–Cite to create a paper with in–text citations and bibliography
- Work offline
- Find references in your RefWorks database
- Search the library catalogue from within RefWorks
- Remove duplicate records
- Use the edit option to change a citation style

© Library, Special Collections & Museums, 2012/13

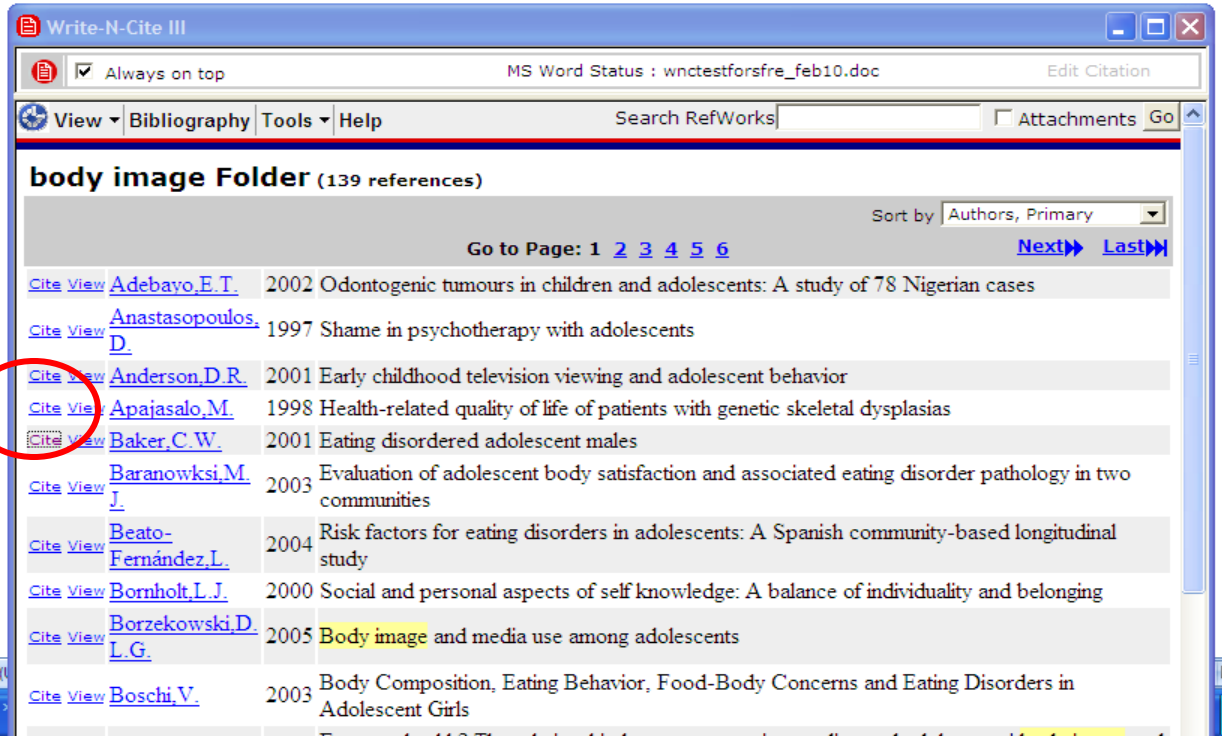
# Write–N–Cite

- Allows you to insert citations (saved in RefWorks) directly into your text as you write
- Formats in-text citations and a bibliography/reference list at the end of the document to a chosen citation style
- Opened from an icon on the Desktop of PCs in University classrooms & clusters
- Important – must use WNC vIII (a previous version). Most recent version (v4) is not yet supported by UK universities – too many technical issues. Waiting for fixes….

© Library, Special Collections & Museums, 2012/13

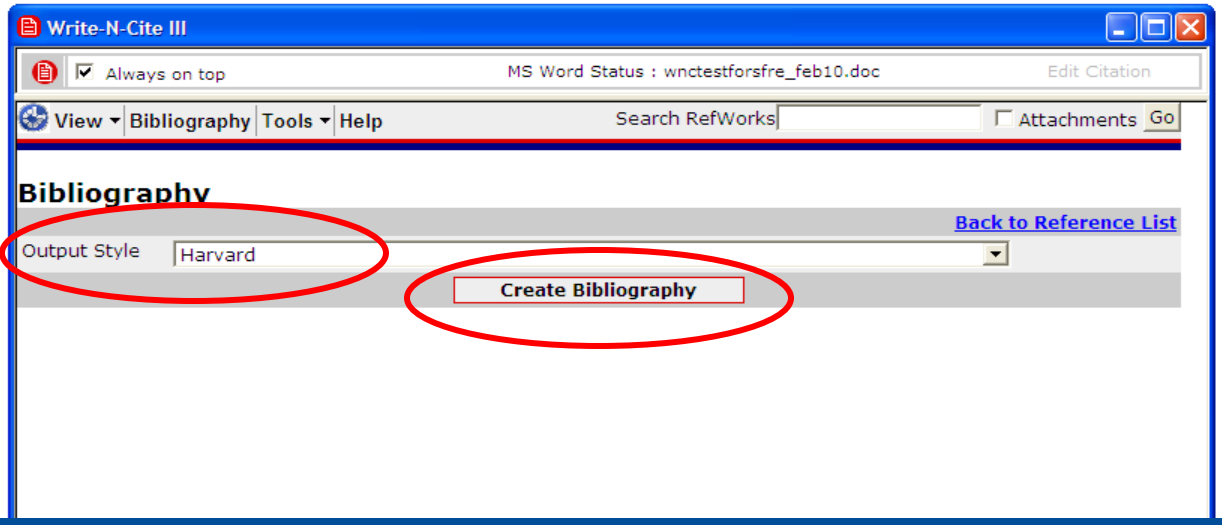
# Using Write-N-Cite to insert citations as you write

This is a sample piece of text to demonstrate the insertion of references {{3374 Bornholt,L.J. 2000}} using Write-N-Cite (WNC). WNC works in conjunction with the Word programme {{3415 Shaw,S.M. 1989}} and produces in-text citations that look a little odd. These use RefWorks code and is not how your document will look {{3352 Duke,L. 2002}} once you have finally formatted it{{3350 Adebayo,E.T. 2002; 3360 Baker,C.W. 2001}}. To insert a reference from your account click on Cite in WNC at the appropriate point



# >3,000 named styles available

This is a sample piece of text to demonstrate the insertion of references {{3374 Bornholt,L.J. 2000}} using Write-N-Cite (WNC). WNC works in conjunction with the Word programme {{3415 Shaw,S.M. 1989}} and produces in-text citations that look a little odd. These use RefWorks code and is not how your document will look {{3352 Duke,L. 2002}} once you have finally formatted it {{3350 Adebayo,E.T. 2002; 3360 Baker,C.W. 2001}}. To insert a reference from your account click on Cite in WNC at the appropriate point



Selected Harvard style (but note – many variations on this style)

# Formatted version with in text citations and reference list at the end

This is a sample piece of text to demonstrate the insertion of references (Bornholt 2000) using Write-N-Cite (WNC). WNC works in conjunction with the Word programme (Shaw, Kemeny 1989) and produces in-text citations that look a little odd. These use RefWorks code and is not how your document will look (Duke 2002) once you have finally formatted it (Adebayo, Ajike & Adekeye 2002, Baker, Eliot 2001). To insert a reference from your account click on Cite in WNC at the appropriate point

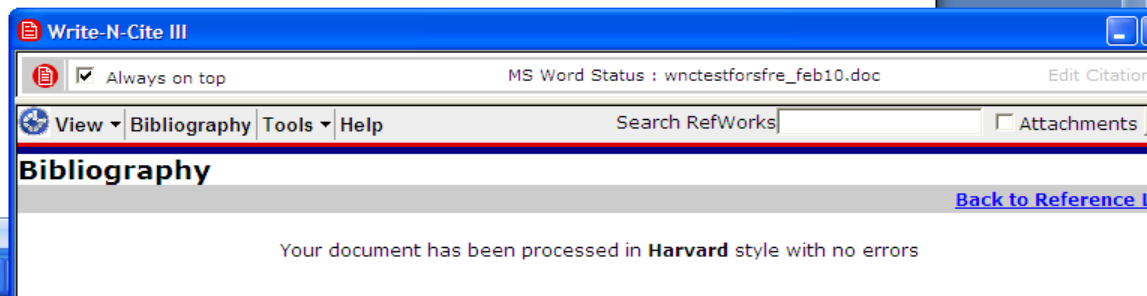
Adebayo, E.T., Ajike, S.O. & Adekeye, E.O. 2002, "Odontogenic tumours in children and adolescents: A study of 78 Nigerian cases", *Journal of Cranio-Maxillofacial Surgery,* vol. 30, no. 5, pp. 267-272.

Baker, C.W. & Eliot, A.O. 2001, "Eating disordered adolescent males", *Adolescence,* vol. 36, no. 143, pp. 534-543.

Bornholt, L.J. 2000, "Social and personal aspects of self knowledge: A balance of individuality and belonging", *Learning and Instruction,* vol. 10, no. 5, pp. 415-429.

Duke, L. 2002, "Get Real!: Cultural Relevance and Resistance to the Mediated Feminine Ideal", *Psychology and Marketing,* vol. 19, no. 2, pp. 211-233.

Shaw, S.M. & Kemeny, L. 1989, "Fitness promotion for adolescent girls: the impact and effectiveness of promotional material which emphasizes the slim ideal.", *Adolescence,* vol. 24, no. 95, pp. 677-687.



# How can I find out more?

- Sign up for Library Information Skills Workshops
  via www.abdn.ac.uk/coursebooking
- Subject support
  make an appointment to see the Information Consultant for your subject
